Dear Michael Lamb

We hereby announce that two Oxygen sensors R-17 were operational less than one month. One month ago our customer open new packages and now both of them are out of range. The customer returned these sensors to us and ask to replace them. How to be with old one? Can we send them back to you? Can you replace these two? Sensors serial numbers added at picture.

With best regards,
On behalf of Merike Moldau

Toomas Simon
