

Packaging Trial & Validation

The following should be checked:

- The unit being sent is to the specification as detailed on the official order.
- The Instruction Leaflet is included.

Packaging:

- Coil the instrument on the Jig to facilitate closure in its box
- Use one pre-designed plastic box with foam inserts, alternatively use the white cardboard box with retaining windows
- Place in box ensuring it is fully closed.

Repairs:

- Customers' Repaired instruments are similarly coiled and packed but are solely packed in the white cardboard boxes – no leaflet is supplied.

Postage:

- For single and multiple orders – Despatch is via the Postal Service or an applicable courier with adequate insurance.

To date, no complaints have been received on packaging
