

Dear Sir / Madam,

It is with great pleasure that we inform you about the new developments within Compressor Service Techniek B.V. (CST). As of today, CST has merged with Kleinjan Compressoren B.V.

Both companies are active from different angles in compressor technology for breathing and compressed air solutions and related service activities. The objective of this merger is to be able to offer an integrated brand portfolio and package of services for both low and high pressure needs in the market. The aim is to further expand the activities nationwide. In the new composition, both companies are part of the Industrial Engineering division of the Voskamp Group.

The management will be in the hands of co-owner Mr. Ronald Kleinjan, who will manage the new combination as director. For the time being, both companies will continue to operate from their current location with the aim of eventually merging at one location and under a new company name.

We expect that the merger of both companies will offer you as a relationship even more expertise and possibilities for the optimal functioning of your breathing and/or compressed air installation(s).

We look to the future with confidence and would like to continue and expand the cooperation with you and your organization.

For further information, please contact director Mr. Ronald Kleinjan (+31 6 52 02 52 25).

Sincerely,

Mr. Ronald Kleinjan
Director
