Dear Ryan,

It's OK, there is nothing which could cause any problems.

But please explain the situation for better understanding. Original Servo i O2 sensor was/is manufactured by EnviteC Honeywell, based on an exclusive contract with Siemens. So I totally do not understand the situation with this apparently new OOM108 EnviteC sensor. What is this? How and why?

Betti

Hi Betti

Please find a sample copy of the test requirements attached, please let me know if this would be achievable.

Best regards

Ryan

Dear Ryan,

Yes, I have some potential customers. First I need to check the documentation which you need to be completed by the customer and the do list.

Hi Betti

Brilliant, we have some samples that require field testing, once this has been carried out we should be ready to supply. I don't suppose you have a good client who might be willing to test one for us?

Best regards

Ryan

Hi Betti

Do you have a demand for the Maquet sensors if we could offer you a compatible one?

Best regards

Ryan

Dear Ryan,

It seems that the manufacturer has problems with lead free O2 sensors. I still hadn't got a real deadline. I am sorry.
