

Job Number/Description 980301 Extension Cables

Requested By Distributors & Customers

Date January 1995

Location

Position

Telephone No.

Description / Specification/Brief

SpO: Extension Cables are designed by the OEM splitting the cable usually with a D Sub connector

Due to problems with MCI quality the extension cables will be manufactured in-house.

There are many new types of extension cable becoming available and market requirements demand a quick answer

The product will be designed by reverse engineering

Test Requirements

EMC tests have been carried out by a Test house

Electrical tests are carried out using the OEM instrument and probe.
