Hi Steve

Thank you for clarifying the position re charging, we think the kit with official charger 0111277 would be best.

Please amend the order accordingly.

Many thanks

Hi Denise,

Can I just confirm that is it the standard unit with no charger and not the kit with the charger that you want?

Just to clarify what this will mean in practice:

- Whilst it can be charged with a USB cable, the MySign O cannot be used with a patient whilst in USB charging mode and can only be operated with patients as a rechargeable device.
- It takes 6 hours to charge by USB from a PC, 4 hours from the official charger.
- The operating time is around 24 hours in a non-alarm condition.

I think the kit with the official charger would be the best option, especially for longer procedures, but if you can firm that this is all OK, I will get the order processed as it is.

For reference, the price of each is:

- 0111276 MySignO Oxygen Monitor @ £347.00+VAT

- 0111276 MySignO Oxygen Monitor @ £394.85+VAT

I look forward to hearing from you.
