Hi Ryan,

Thanks for your email and clarification.

In that case, can I please request a proforma invoice for the following;

6 R17VAN sensors and;

4x my sign O kits

Many thanks for your kind assistance.

Jensen Pratts

Subject: Re: Order

Hi Jensen

The sensor for the MD300 is the R-17VAN and we have them available from stock, they are still used with some of our other analysers, so they are always available.

The Mysign high alarm can be set up to 100%, so 25% is no problem.

In regards to your order, are you sure you want so many spare sensors for the Mysign? The sensors have a warranty of 12 months, but should last approximately 2 years. We recommend putting sensors into use within 6 months in order to take advantage of the warranty.

Best regards

Ryan

Good afternoon Ryan,

Many thanks for your email.

Regarding the MD300, do you happen to still have oxygen sensors for them in stock? What is their duration?

In reference to the MySignO, can the alarm be modified to a high of 25?

We would like to place an order as follows;

4 x- MySign O - pn:0111277 = GBP £395 each EXW

12 x The Mysign O uses the OOM111 Oxygen Sensor:

OOM111 - pn: 0110560 = £72 each EXW

Grateful if a proforma can be sent for the above in order to arrange payment.

Thanks for your assistance, wishing you a great weekend.

Kindest regards,

Jensen

Dear Jensen

Thank you very much for your email.

Unfortunately the MD300 analysers are no longer manufactured. I believe you require adjustable high and low alarms for monitoring, so I would like to make the following suggestion as an alternative:

MySign O - pn:0111277 = GBP £395 each EXW

The Mysign O is supplied as a kit with O2 sensor, rechargeable battery and mains power supply. I would recommend having it plugged in to the mains during use, the battery will last 24 hours.

The Mysign O uses the OOM111 Oxygen Sensor:

OOM111 - pn: 0110560 = £72 each EXW

Please let me know if you have any questions and if you would like me to put a proforma/quotation together for you.

Kind regards

Ryan
