Dear Neil,

Following your fax of 24-7-00, we agree to the content with regard to cost, design & rights and delivery times.

Please note however, we do have a requirement for the two points below :-

1. We require to see & test a prototype (in whatever shape or form), to ensure that your design does indeed meet our requirement, to prevent any oversights which may occur.
2. There may be a requirement in the future for the upper & lower alarm thresholds to be changed from 16 - 26% O₂ to 0 - 100% O₂. Can you please ensure that your design will accommodate this.

You may draw up written agreement between yourselves and Viamed Ltd for signing if necessary.

With regards,

Simon Watmough.
