The screenshot shows a table comparing shipping costs for two different scenarios. A large '+1' is written over the table, indicating a difference or addition.

Scenario	Weight	Dimensions	Volume	Rate	Notes
Original	10.00 kg	30.00 cm x 20.00 cm x 10.00 cm	0.060000 m³	£14.86	
New	10.00 kg	30.00 cm x 20.00 cm x 10.00 cm	0.060000 m³	£17.81	

so you have the original ups costing and also the new one and the exchange rate so the difference is £14.86 plus the viamed charge = £17.81 convert to euro 20.48 so add a new proforma for the 75 eyemasks and also add carriage cost of 20.48 and in the email state to them that we will ship with CVM143400 and this is the cost difference of adding another box, also make notes on both orders to state to ship together
