Prosol 0110365 back order status
Issue ID #298983
Date Created 26/Jun/2023
Issued To: Kate Griffiths
Completed Status: Still Outstanding

Notes:

Added by Steve Nixon sent to Kate Griffiths
CVM144016

I believe that this was an unexpected order to and from Prosol. All we can do is try and supply ASAP, either in full or in 2 batches of 100, we may be able to adjust as and when we receive other stocks. For the time being please set provisional shipment date as 26th July and set as OK to deliver earlier.

CVM142914
We usually get the sensors in earlier, but as far as the customer is concerned he is expecting them the week of 3rd July. At the moment we are scheduling to ship the same week. To be safe set as set as OK to deliver earlier.
