Hi Kate,

I hope all is well. I'd like to order 10 additional sensors. Can you confirm the price?

Thanks,

Philip

Good afternoon Philip,

I am sorry for the delay in my reply. I am still awaiting a reply from the warehouse team. I have not had a definite no, so I am still hopeful and have explained the previous delay with us not being able to supply your sensors when you first contacted us.

I remain hopeful but hesitant and will let you know as soon as I hear any news.

Thank you for your patience.

Good afternoon Philip,

Thank you for your payment.

I think unfortunately this order will have a lead time of approximately 5-6 weeks.

It may be that the warehouse can manage to ship your order from our current stock, I have asked them if this is possible, since the delay you experienced before we could place your order. I may have some better news for you next week, but most likely the lead time will be approximately 5-6 weeks.

Many thanks.

Hi Philip,

Thank you for your reply. Please accept my apologies, I meant **do you need each sensor to be packed in its own box**, or are they ok in their sealed packets in the outer box? The warehouse ensure that for either method the sensors are packed safely and securely. (This information is requested so I can obtain the correct weights and dimensions to work out the shipping cost)

Good afternoon Philip,

Thank you for your reply, I will finish your proforma invoice tomorrow when I am in the office.

In the meantime, please could I ask if you would like the sensors individually boxed or bulk packed? Also, please could I ask for a contact telephone number? UPS require one, so I need to add it to your proforma invoice.

We have a small amount available from stock, subject to being quality assessed. Stock levels change constantly of course!

Many thanks.

Good morning Philip,

Happy New Year.

I have been asked by our Export Manager to quote you our pricing as Ron has been unable to assist you. I am sorry that this was not something we were able to do from the start.

The price breaks for part number 0110081 - oxygen sensor UFO 130-2 are as follows:

1 = € 175.35	2 = € 157.82 each EXW	3-10 = € 149.05 each EXW	11 or more = € 140.28 each EXW
-----------------	--------------------------	-----------------------------	-----------------------------------

I would like to set up a new account for you if you still require these sensors and are happy for us to supply them. Please could I ask you for your delivery and invoice addresses and telephone number?

How many would you require?

Many thanks.

Kind regards

Kate Griffiths
