Stephen

Please find enclosed our quotation for 152 metres of each part. We have tried to keep the cost down as much as possible but as you can appreciate the freight on small quantities is quite expensive.

Delivery quoted is 5-6 weeks I have spoken to David and he thinks we may be able to get it down to 3-4 weeks.

I have also enclosed material safety data sheets for PVC and Newaloy 61 (cadmium copper)

Regards

MANUFACTURING TOLERANCES: The material on this quotation is custom made to order and, as a result, it is improbable that the production run will result in the exact quantity ordered. This quotation is made with the assumption that a reasonable delivery tolerance will be acceptable. If exact quantities are mandatory, an additional charge may be necessary. When part tolerances are not specified RMA tolerances shall apply.

Except to the extent otherwise expressly provided above, all quotations, orders, sales and deliveries as to this or any other merchandise are subject to the terms and conditions on the reverse side hereof, notwithstanding any contrary term or condition in the buyer's purchase order, or otherwise.

Dear Peter,

Extra Tooling Required

We realise the \$25K is needed to finish the current tooling project are any further costs anticipated to produce Nellcor and Ohmeda finger probes.

Flexible probes will be required what are the estimated costs and delivery times?

The range of flexible probes will probably mirror that of finger probes although start up quantities could be smaller.

What is required before we can release disposables.

Kind Regards,

John S. Lamb.
