Instructions to Program Intruder Alarm Tag

Press D and enter manager code which is 2222

Press NO until display shows change codes when this shows press

YES

Should then show Change User Code press

YES

User Number 001 should show- you need to check programming of existing tags to find settings for new tags by doing the following;

Press YES (Should show xxxxx)

Press YES

Should show user type user 0

Press YES

Control Panel will then show the areas you already have, please make a note of these area **AB**

Press YES

Should show user set options unset/set

Press YES

Will then show Flexi Set **NO**

Make a note if panel says YES or NO

Now press NO to get back to User Number

To Program in Tag **611**

Enter next vacant user Number (this is dependant on how many tags are already in system already)

If enter Number and shows xxxx this number is already is use

Panel needs to show: enter user code () *empty brackets*

Now present new Tag to control panel till it beeps and display shows xxxxs

Press YES

User Type

Press YES

User Areas (should show all areas lit)

Whatever area you noted earlier press this letter

Press YES

User Set Option(if you want the tag to set the alarm)

Options are

Set/unset

Set only

Unset only

None

Press YES

Will now show Flexi Set, this will always show as NO but if you noted YES in 1st stage of programming press 1-This should now be changed to YES
Then press YES

If you have Access control and you wants tags to work the doors

Press Yes

Enter a number which the door is connected to and press YES

011-011
012-012
013-013

Once you have completed the list press NO it will go to the next menu
Enter a name for the Tag the keypad works like a mobile phone keypad

A=Capital letters

B=Move cursor left

C=Clears Character, creates a space

D=Cursor moves right

YOUR TAG IS NOW PROGRAMED IN

Panel should now be showing User Number

To exit Manager Menu keep pressing NO until panel say

Exit Manager Menu

Press YES

Please remember to test your tag!!!
