Dear Peter

Further to your enquiries today, I am pleased to be able to send you the technical specification for our Suction controller.

I would also confirm that we can offer a full training course for servicing and maintenance which costs £250.00 per day (inclusive of lunch).

Servicing on our site would cost £23.97 plus parts, plus VAT. There would also be a delivery charge if outside our Reps' collection area.

Hope this helps.

Regards

Sue
