Hello Ryan,

I'm wondering if I can place an order for an additional 50 units of this sensor. Can you give me an idea of lead time please?

Thank you,

Tom Stawicki

Hi Tom

Thank you very much. Please find your proforma invoice attached, including transport costs. If you would prefer to arrange your own transport, please use the following details:

1x Box

31x31x27cm, 2kg

If you are happy to proceed with this order, please can you make your payment to the details listed at the bottom of the proforma invoice or we can take credit card details over the phone. Please let me know if there are any amendments required or if you have any questions.

Kind regards

Ryan

Hi Tom

The output specifications for the R-33VAN(RP) is 23-27mV in Air which we believe to be within the specifications of the Analox sensor, but they do not publish their specifications. Please find our trade pricing below:

R-33VAN(RP) = GBP £40 each EXW

I can calculate delivery costs for you if you can supply your delivery/invoice address details.

Best regards

Ryan

Thank you Ryan,

I would like to place an order for 20 of the units. Can you please confirm that the voltage output is the same as the Analox version for me? I will then forward a Purchase Order which may need additional information depending on your requirements.

Thank you,

Hi Tom

Thank you very much for your message.

I can confirm that our R-33VAN(RP) is a suitable replacement for the Analox 9100-9212-5AD.

We have sensors available from stock in a semi ready state that only require final assembly. The lead time is just 1-2 days from receipt of payment to dispatch.

We would be happy to supply you in the US, if you would like to give me your complete delivery/invoice details and the quantity you require I would be happy to put a quotation together for you?

I look forward to your reply and any questions you may have.

Best regards

Ryan

We currently utilize an oxygen sensor manufactured by Analox (Part #US-9100-9212-5AD). Can you tell me if your "R-33VAN (RP) Oxygen Sensor (0110239)" is compatible? Do you have a specification sheet that you could forward? Is stock available and can you ship to the US?

Thank you,

Tom Stawicki
