Dear Lester

Thank you for your message.

We would be happy to supply you on a trade basis. Please find attached our trade prices and some product information.

With regards to analysers, for individual divers our TEK-OX has proved to be the most popular model. I would recommend the auto off version, as it eliminates the risk of leaving it on in the box and depleting the batteries before the next time you need to use it. Also flat batteries can have a tendency to leak and cause more trouble.

Both our VN202 and TEK-OX have a 5 year warranty against manufacturing faults, this excludes the sensor, batteries and cable where applicable.

The sensors have a 12 month warranty, but typically last 2+ years in normal use, some have been known to last up to 4 years.

Please note that we do not impose any minimum order quantities, but we would ask that

your orders are prepaid by either bank transfer or credit card, at least until we built up some trading history. If you would like to place an order, please can you send me your invoice and delivery address. We would also need the contact number and email address for your accounts, purchasing and owners of the company.

I look forward to your feedback and please let me know if you have any questions.

Kind regards
Ryan
