

## Environmental and recycling information:

Waste Electrical & Electronic Equipment,  
oxygen sensors and batteries.

### WEEE (Waste Electrical & Electronic Equipment)

Viamed takes its responsibilities under the WEEE Regulations extremely seriously and has taken steps to be compliant in line with our corporate and social responsibilities.

We meet the requirements with regard to disposal of WEEE in accordance with the WEEE Directive 2006 and have joined a registered compliance scheme WEE/MP3538PZ/SCH.

In regard to the Waste Electrical and Electronic Equipment regulations our Environment Agency producer registration number is **WEE/DD1952ZQ**.

Electrical and electronic equipment should not be disposed of with general waste, but should be separately disposed of for proper treatment and recovery. The crossed-out bin symbol placed on product or labeling/packaging, reminds you of the need to dispose of the product correctly at the end of its life. In this way you will assist in the recovery, recycling and reuse of many of the materials used in the product.

You can either dispose of WEEE in accordance with local ordinances and regulations or when buying a new product from Viamed you have the possibility to return another end of life product of equivalent type that has fulfilled the same functions as the supplied equipment. You are responsible for the return packaging and carriage costs, but we will process the returned WEEE free of charge on your behalf.

Return address for WEEE:

Viamed Ltd.  
**WEEE Processing**  
15 Station Road  
Cross Hills  
Keighley  
West Yorkshire BD20 7DT.

With your help it is possible to reduce the amount of electrical and electronic waste ending up in landfill and to improve quality of life by preventing the release of potentially hazardous substances into the environment.

## **Oxygen sensors (electrochemical)**

We minimise waste, especially hazardous waste, in all our operations and product development and dispose of all waste through safe and responsible methods.

We meet the requirements with regard to disposal hazardous waste in accordance with The Hazardous Waste Regulations 2005 through a fully licensed waste management company.

In view of this we offer a service to our customers where we will safely dispose of any returned depleted oxygen sensors through our oxygen sensor disposal service. If required a returns bag and address label will be provided upon request. This service is offered free of charge - but excludes the return carriage costs.

Viamed Ltd.  
**Depleted Sensor Department**  
15 Station Road  
Cross Hills  
Keighley  
West Yorkshire BD20 7DT

## **Batteries**

Depleted batteries supplied with our products can be disposed in accordance with local ordinances and regulations. Alternatively you can take depleted batteries to a free of charge collection point such as offered by BatteryBack, to find the nearest collection point go to [www.batteryback.org](http://www.batteryback.org)

When battery powered equipment is returned to Viamed for service, repair or calibration we will test the batteries - if found to be depleted we will offer to dispose of them on your behalf.
