

NeoMask

Phototherapy Eye Mask

Instructions for Use

1. The NeoMask is not a bandage; cover any existing skin abrasions appropriately before use.
2. Remove the NeoMask from the packaging and disconnect the rear fastener.
3. Position the NeoMask such that the blue eye pad covers the patient's eyes. The other tab (upper) is positioned across the patient's forehead.
4. Wrap the NeoMask around the head, so that it covers the ears - then secure together with the rear fastener.
Do not over tighten. Ensure that the mask is not hooked over the ears and that the ears are not folded over.
5. Positioning of the NeoMask can be adjusted by using the front: upper and lower tabs.
6. If necessary - for optimal fit, the upper tab can be adjusted. The two parts of this tab can be pulled apart, then laid flat against the forehead: the end with the fastener wrapped over on top of the other.

 Monitor the position of the NeoMask on a regular basis and ensure that it does not obstruct the patient's nose. If the NeoMask becomes over-stretched, replace with a new one.

Large

1114015: Occipital-Frontal Circumference **32 - 38cm.** Pack of 20

Medium

1114016: Occipital-Frontal Circumference **26 - 32cm.** Pack of 20
