Message:

Hi guys,

we're using your Vandagraph Tek-Ox for almost a year now. Super happy.. until last week. One read unusual high (starting at 68%) and the other started at 0% and wouldn't go up. I ordered a new sensor, placed it.. no result. Do you have a suggestion?

Serial codes: TX3449 and TX3451.

Hope to hear from you,

have a great day, Pascal
