Dear Posey

We recently received a letter from you detailing some of your products. We are keen to consider using the removable ID bracelets as we often have issues with our ID bands making patients skin sore. The matron is willing to consider this option but would like to see a sample before committing to ordering them. Please could you send us a few of the newborn sized ID bracelets so we can have a look at them and see if they will work with our wristband systems. Our address is:

Paediatric Intensive Care Unit
Queens Medical Centre
Nottingham University Hospitals NHS Trust
Derby Road
Nottingham Nottinghamshire
NG7 2UH

A few other questions:

- Do you have a recommendation for how often a patient would need a new removable wristband?
- Do you have this product in a larger size for our older children with sensitive skin?
- Are there any other hospitals that use this product under a pre-printed wristband to protect the skin or attach part of a printed wristband in some way, our system does not print adhesive labels. We currently use the Zebra barcode wristbands.

I look forward to hearing from you. I am not back on shift until Saturday 23rd so can respond to emails after that.

Sarah Harley

Junior Sister

Nottingham Paediatric Critical Care Unit
