	TENS - TENS Units, Electrodes, Leadwires, Gels	91-92
	Stainless Steel Instruments - Stainless Steel Surgical Instruments, Instrument Marking Tape	93
	Tubing Connectors - Straight Connectors, Reducing Connectors, 'Y' Connectors, 'T' Connectors	94
	Uncategorised - Neonatal IV Supports, Neonatal Phototherapy Eye Shades, Umbilical Vessel Catheters, Mucus Extractors & Traps, Disposable Tape Measures, IV Armboards, Hypodermic Safety Needles, Insulin Safety Needles, Patient ID Bands, Curity Gauze Sponge, Blood Lancets, Micro Cover Slips, Mixing Needles, Wash Squares, Urine Drainage Bag Hangers, Disposable Razors, Tongue Depressors, Wooden Applicators, Lemon & Glycerine Swabs, Marker Pens, Catheter Spigots, Screen & Shower Curtains, Patella Hammers, Tourniquets, Dissecting Forceps, Clips, Clamps, Strap Closures	95-98

Neonatal Disposable One-Piece Blood Pressure Cuffs

Our range of neonatal cuffs IS available in four high quality materials: a soft DuPont Sontara® fabric version, a PVC-free polyurethane version, a vinyl non-sterile version and a clear vinyl sterile version. Both double- and single-tube options can be supplied, ranging from size 1 to 5. They are supplied with a 5/16" male luer slip connection, or 3/16" male luer slip connection on non-sterile item nos NN1STM316 - NN5STM316. A bayonet fitting is also available on all but the sterile vinyl version.

Accurate Blood Pressure is Critical

- UltraCheck & SoftCheck Curve Cuffs are designed to fit the patient's arm correctly
- Conical shape fits snugly against the arm & properly compresses the artery

Features

- Will not slide during inflation
- Meets AHA/ AAMI Standards
- Genuine Velcro® closures
- Manufactured without natural latex
- Statcorp adapters allow for compatibility with monitors worldwide

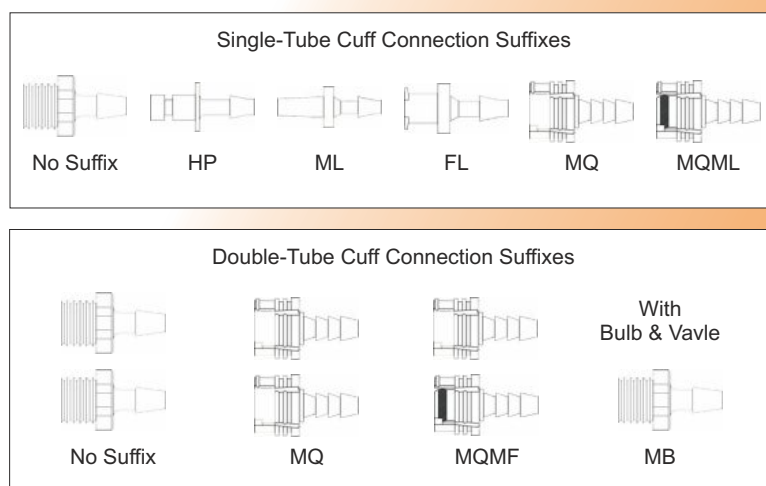

Two Styles Available:

UltraCheck Curve Reusable

- Anti-microbial protection built into the fabric guards against microbial deterioration which can affect the physical properties of the material*
- Manufactured without PVC / DEHP

SoftCheck Curve Disposable

- Soft fabric helps prevent perspiration under cuff which can lead to skin breakdown

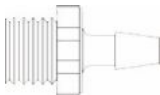

Fabric

These products are single-patient use and are made from a soft DuPont Sontara® fabric. They range in size from 8cm to 50cm, with both single- and double-tube options available. They meet AHA and AAMI standards for size and accuracy. Connectors are available for most NIBP devices and are pre-fitted for the most popular types. These cuffs are soft, comfortable and supplied with Velcro-type fastenings.

Reusable Two-Piece Double-Tube Blood Pressure Cuffs

Nipset® Blood Pressure Cuff Connection System

Nipset is designed to safely reduce compatibility problems between cuff and monitor types. The Nipset system incorporates two connectors, one BLUE and one GREEN. Simply attach the GREEN connector to the monitor hose and the BLUE connector to your cuff hose to create a safe, 100% air-tight, cost-effective method for connecting your blood pressure cuffs. Our range of disposable and reusable Cuffi® cuffs are available complete with a Nipset connector.

Cat No		Pack	Price
F001	NIPSET GREEN HOSE-END FOR SINGLE HOSES	5	15.00
F002	NIPSET GREEN HOSE-END FOR DOUBLE HOSES	5	15.00
M003	NIPSET BLUE CUFF-END (SINGLE HOSE ONLY)	20	126.00

Cuffi® Disposable One-Piece Blood Pressure Cuffs

These products are single-patient use and are made from a soft DuPont Sontara® fabric. They range in size from 8cm to 50cm and meet AHA and AAMI standards for size and accuracy. Available in single-hose style only with a Nipset® connector and Velcro-type fastenings.

With universal Y adaptors you can convert your existing double-tube hoses to use single-hose cuffs or vice-versa. This allows you to standardise on a single-cuff adaptor regardless of your monitoring inventory, offering space and cost savings. They also allow you to standardise on readily available connectors, therefore not tying you to specific brands.

Accoson Sphygmomanometers - Greenlight 300™

- Replacement of mercury instruments a simple matter without disruption and without loss of accuracy.
- The accuracy of a mercury sphygmomanometer without the need for health and safety considerations.
- None of the fragility of an aneroid gauge.
- A bright, clear, large-scale display; the moving light indicates the cuff pressure.
- Clinicians retain the confidence of the Riva-Rocci/Korotkoff method of measurement, with the advantage of the following aids to improve their measuring technique:
 - The cuff deflation rate is displayed to help the user deflate between 2 and 3mmHg per second as recommended by the British Hypertension Society.
 - Display design encourages measurement to 2mmHg as recommended by the British Hypertension Society.
- Automatic pressure zero when switched on, to ensure accuracy.
- Automatic switch-off when conditions could affect accuracy.
- Extended battery life with low battery indicator. The battery compartment is accessible from the front in all versions of the instrument.
- Supplied as a portable desk model which can be converted easily to a wall-mounted or mobile stand version using the kits available.
- Supplied with coiled tubing for convenient and tidy use.
- Complies with all the applicable requirements of the European Standards for Sphygmomanometers EN 1060-1:1995, EN 1060-2:1995, EN 1060-3:1997 and IEC EN 60601-1:1988 Medical Electrical Equipment Part 1 General Requirements for Safety.

Operational range: 10°C to 40°C

Storage range: -20°C to 70°C, 0 to 100% RH

Batteries: 4 x AA/LR6 alkaline cells (not included)

Battery life (typical): 170 hours continuous use

Time from start of battery warning signal to device failure (typical): 3.5 hours continuous use

Range: -2mmHg to 300mmHg, with under-range and over-range indicators

Accuracy: Better than ± 3 mmHg

Protection against electric shock: Internally powered type BF

Protection against ingress of water: IPX0

Protection against flammable anaesthetic mixtures: None

Designed and manufactured in the United Kingdom with the technical and scientific support of the Regional Medical Physics Department of Freeman Hospital and the University of Newcastle Upon Tyne.

The Greenlight 300 converts to a wall-mounted instrument when fitted with the wall conversion kit code AC1772, which consists of:

- A swivel mounting bracket which allows the instrument to be turned in two directions. This gives easy viewing of the display, particularly when the instrument is placed between two beds.
- A separate cuff container to accommodate the cuff and tubing.

The Greenlight 300 converts to a mobile stand model when fitted with the stand conversion kit code AC1774, which consists of:

- A large container for the cuff and tubing onto which the instrument is fitted. This is set at an angle for easy viewing.
- A mounting stem and heavy cast base with five castors to give both mobility and stability.

Accoson Sphygmomanometers - Hand-Held Models

We offer three types of hand-held sphygmomanometer - Limpet, Pocket and Duplex. All are guaranteed accurate to British Standard specification EN 1060-1. All are easy to use and suitable for both right- and left-handed people. They are all latex-free and supplied in a zipped soft pouch case.

The Limpet model is manufactured from a lightweight plastic mould.

The Pocket model is manufactured from a lightweight diecast case and is fitted with a spring clip for attachment to the cuff.

The Duplex model is manufactured from a lightweight diecast case and is fitted with an inbuilt screw valve for easy thumb and fingertip control of air release.

Accoson Sphygmomanometers - six Series Aneroid Models

We offer three types of Six Series aneroid sphygmomanometer - Stand, Wall and Desk. All are guaranteed accurate to ISO 81060-1 and they are 100% latex-free. The adjustable height stand model has the gauge inclined for easy viewing. The wall model features a fixed or swivel wall bracket for easy viewing and cuff storage behind the gauge. An optional Velcro plate allows easy, hole-free wall mounting. The desk model is fitted with a large carrying handle and cuff storage basket plus rubber feet for stability.

We offer three types of six inch aneroid sphygmomanometer - Stand, Wall and Desk. All are guaranteed accurate to British Standard specification EN 1060-1. The precision mechanism ensures smooth and reliable performance and gives immediate response to changes in cuff pressure. They are all 100% latex-free. The stand model has the gauge inclined for easy viewing and a heavy base with five castors.

The wall model features a swivel wall bracket for easy viewing and cuff storage behind the gauge. The desk model is fitted with a large carrying handle and cuff storage basket plus rubber feet for stability.

Heine Sphygmomanometers

Gamma G5

Shock proof movement with impact-resistant housing crafted with special shock absorbing materials. Microfilter protects the valve and movement. Over-sized inflator speeds up inflation times. Suitable for left or right handed use. Latex-free.

Gamma GP

Similar to the G5 but with innovative central push-button air release.

Gamma GST

Similar to G5 but ideal for self-test due to in-built stethoscope.

Gamma XXL

Large 130mm dial, pivotal for easy viewing. Storage space for cuff and inflation system. Long 3m spiral tubing allows long working distance. Copper-Beryllium manometer, precise and long-lasting. Heine 10 year guarantee. Ideal replacement for mercury BP monitors. Latex-free.

Invasive Blood Pressure Transducers

Intended for arterial and venous blood pressure monitoring and blood sample testing, these disposable invasive blood pressure transducers are available with five types of popular connector.

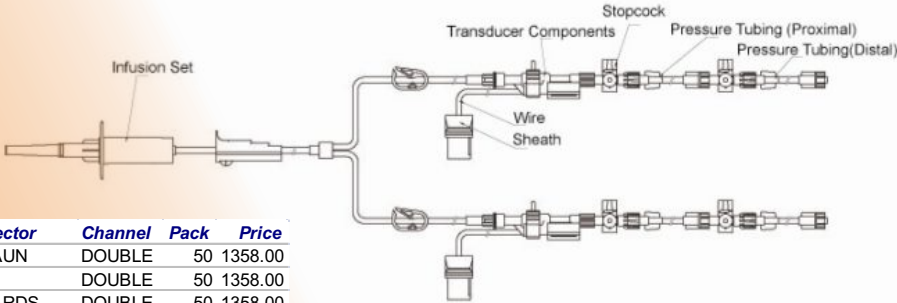

Connector	Standard Lock Connector	Sensitivity	5.0µv/v/mmHg±5%
Flush Speed	≥3ml±1ml/1h/300mmHg	Leakage Current	<10µA
Pressure Measurement Range	-50~300mmHg	Marker	Artery-Red, Venous-Blue

Single Channel Sets

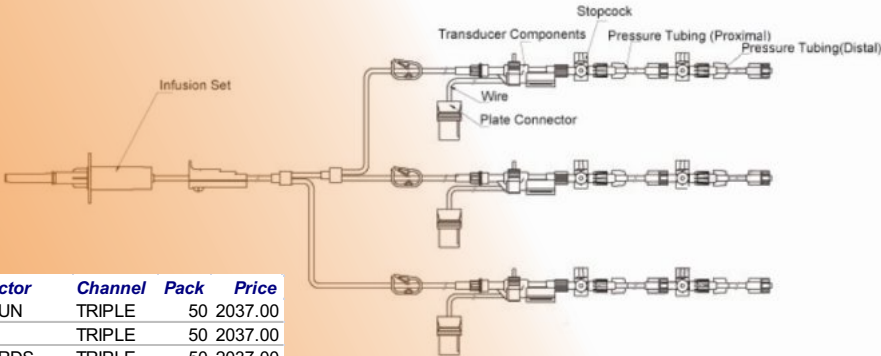

Cat No	Connector	Channel	Pack	Price
DPBB	B.BRAUN	SINGLE	50	680.00

YSI-Compatible Disposable Temperature Probes & Reusable Instrument Cables

Affordable and economical alternatives to reusable probes. A reusable, cleanable instrument cable attaches to the monitor and sterile disposable probes attach to the cable.

Cat No		Pack	Price
4491H	400 SERIES DISPOSABLE TEMPERATURE PROBE - GENERAL PURPOSE 9FR	25	100.00
4492H	400 SERIES DISPOSABLE TEMPERATURE PROBE - GENERAL PURPOSE 12FR	25	100.00
4499H	400 SERIES DISPOSABLE TEMPERATURE PROBE - SKIN SURFACE	25	82.00
4791H	700 SERIES DISPOSABLE TEMPERATURE PROBE - GENERAL PURPOSE 9FR	25	155.00
Cat No		Pack	Price
400H	400 SERIES REUSABLE INSTRUMENT CABLE	Each	18.00
400HS	400 SERIES REUSABLE INSTRUMENT CABLE - SIEMENS	Each	18.00
400HHP	400 SERIES REUSABLE INSTRUMENT CABLE - PHILIPS/HP	Each	18.00

Hydrogel Temperature Probe Covers

Our highly comfortable temperature probe covers are designed with sensitive skin in mind. A special hydrogel formula eliminates skin damage when removing or repositioning. The reflective gold insulator serves as a superior barrier against ambient and radiant heat, thus providing maximum temperature reading accuracy. Packs contain approx 100 teddy-shape covers and 100 duck-shape covers.

Cat No		Pack	Price
IPC1	PROBE COVERS SMALL 28 x 25mm (100 TEDDIES, 100 DUCKS)	200	59.00
IPC2	PROBE COVERS LARGE 40 x 34mm (100 TEDDIES, 100 DUCKS)	200	62.00

Temperature Probe Covers & Sheaths

ECG Monitors

- Digital isolation technology minimises signal interference.
- Wide screen LCD with 3-lead waveform display.
- Optional rhythm lead detection for observing abnormal heart rate.
- Built-in rechargeable battery, AC/DC supply.
- Automatic power off.
- Adjustable base line width.
- High resolution thermal array printer.
- ECG data and waveforms store and recall.

<u>Cat No</u>		<u>Pack</u>	<u>Price</u>
UB101G	3-CHANNEL ECG MACHINE WITH LCD SCREEN	Each	575.00

- 7" 800x480 high contrast colour TFT screen.
- 3+R, 6+R, 12+R waveform display.
- High resolution thermal array printer.
- Histogram and trend chart for R-R interval analysis.
- RS232 interface for connection to workstation.
- ECG data and waveforms store and recall.

<u>Cat No</u>		<u>Pack</u>	<u>Price</u>
UB300G	3-CHANNEL ECG MACHINE WITH COLOUR TFT SCREEN	Each	975.00

- 5.7" high contrast LCD display for 12 waveforms.
- R-R interval analysis.
- Economy mode available to reduce printing cost.
- High capacity Li-ion battery offers up to 2hrs continuous power.
- Multiple language options.
- RS232 interface for connection to workstation.
- Internal memory for up to 2Gb of data.

<u>Cat No</u>		<u>Pack</u>	<u>Price</u>
UB1200	12-CHANNEL ECG MACHINE WITH LCD SCREEN	Each	1750.00

Disposable Leadwires

A range of single-patient use ECG leadwires, reducing the risk of cross-contamination.

- Compatible with original OEM ECG trunk cables.
- Built-in ribbon cable for patient comfort and ease of use.
- Easy to read labelling facilitates easy connection and lead placement.
- Unique light blue colour indicates single use.

ECG Gels, Creams, Sprays, Prep Pastes and Pads

SPECTRA® 360 - The only salt-free and chloride-free electrically conductive gel, recommended for all electromedical procedures. Salt-free characteristics make it particularly suitable for long-term applications. Spectra 360 differs significantly from all other electrically conductive media...it works by wetting the skin, thereby reducing skin resistance.

SIGNAGEL® - Highly conductive, multi-purpose electrolyte meets all the standards of the ideal saline electrode gel. Recommended for ECG, defibrillation, biofeedback and EMG.

SIGNACREME® - Highly conductive cream electrolyte for use in electromedical procedures where a cosmetic quality cream is preferred.

SIGNASPRAY® - Highly conductive, economical spray electrolyte and non-gritty skin prep.

REDUX® - The range includes a water-soluble non-abrasive electrolyte gel for routine ECG and defibrillation, a cosmetic quality electrolyte cream for routine ECG and a water-soluble abrasive paste for short-term monitoring, ECG and defibrillation.

CAS 740 Vital Signs Monitor

The CAS 740 allows you to monitor blood pressure, SpO₂ and temperature on patients from neonate to adult and provides leading-edge technology in a rugged, portable unit that weighs just 1.4kg (3lbs).

Easy to use, reliable and accurate:

- Fast, accurate blood pressure readings on patients from neonate to adult, even in the most challenging situations such as high motion or low perfusion
- Monitor SpO₂ and temperature either continuously or in "spot-check" mode
- Accurate oral temperature in just 4 seconds
- Ideal for medical/surgical patients on pain medications including PCA pumps, for hospital or office-based endoscopy procedures and for EMS applications

Features:

- Wireless (infrared) printer option
- User-removable NiMH battery pack, internal power supply and DC option
- Flexible mounting solutions include mobile stand, IV pole, bedrail or wall

Featured technologies:

CASMED's proprietary Motion Artifact Extraction (MAXNIBP®) technology

Oximetry choices include:

Masimo SET®, Nellcor OxiMax® or Nonin®

Temperature:

Covidien

Unifusor features

- IV pole loop
- Fluid bag hook
- Disposable white nylon (Unifusor, Unifusor Classic) or reusable blue nylon (Unifusor Plus)
- Reinforced sleeve
- Can read through the translucent sleeve
 - a) type of fluid
 - b) fluid levels
- No-crimp tubing
- Palm-fitted handbulb
- Thumbwheel air control or a leak-proof stopcock valve
- Aneroid gauge (Unifusor) or piston gauge (Unifusor Classic)
- 100% leak tested during manufacturing

Unimed Pressure Infusion Cuffs

Unimed infusion cuffs are supplied in 3 styles: disposable (with stopcock valve and piston gauge), semi-reusable (with stopcock valve and manometer) and reusable (with stopcock valve and manometer).

Cat No		Pack	Price

3M™ Littmann® Stethoscopes

3M™ LITTMANN® Electronic Stethoscope Model 3200 - 12-Track Zargis® StethAssist™ Heart and Lung Sound Visualization Software

Designed to visualize what you are hearing, allow playback when convenient, facilitate storage of sounds in patient records or transfer to colleagues for further analysis. Zargis® StethAssist™ software connects wirelessly to the Bluetooth-enabled Littmann Model 3200 stethoscope for easy, real-time analysis. Display and print sounds as a phonocardiogram, save patient information for future comparison or send as an e-mail attachment. Now records and stores 12 separate sound tracks for use on multiple patients on multiple sites with no need to download each sound track to your PC each time you record. Ability to add comments to tracks for identification purposes. 2-year warranty.

Cat No	Description	Pack	Price
3200BK12	3M LITTMANN ELECTRONIC, BLACK 27" TUBING	Each	230.00

3M™ LITTMANN® Electronic Stethoscope Model 3100

Incredibly simple. Non-disruptive to your auscultation workflow. The Littmann 3100 is easy to use for quick auscultation every time. The easy-to-read backlit LCD display includes frequency selection, sound level, remaining battery life and your patient's heart rate. It has been designed to ensure comfort and durability for everyday use, weighing about the same as a cardiology-grade acoustic stethoscope. You can auscultate immediately, thanks to our instant-on technology and the stethoscope stays in battery-saving "sleep mode" until you start your next auscultation. The Littmann Model 3100 offers improved sound quality and ease of use to help you make a clear diagnosis, every time. 2-year warranty.

Cat No	Description	Pack	Price
3100BK27	3M LITTMANN ELECTRONIC, BLACK 27" TUBING	Each	259.00

3M™ LITTMANN® Master Cardiology Stethoscopes

The ultimate acoustic stethoscope. The unique patented single-sided chestpiece allows the clinician to monitor both high and low frequencies by simply alternating the pressure on the chestpiece. This stethoscope allows accurate and efficient auscultation without the need to turn over the chestpiece between the bell and diaphragm modes, as in the traditional combination stethoscopes. Double-lumen tubing enhances the acoustic sensitivity. 7-year warranty.

Cat No	Description	Pack	Price
2160	3M LITTMANN MASTER CARDIOLOGY, BLACK 27" TUBING	Each	160.00
2175	3M LITTMANN MASTER CARDIOLOGY BRASS FINISH CHESTPIECE AND EARTUBE, BLACK 27" TUBING	Each	160.00
2176	3M LITTMANN MASTER CARDIOLOGY SMOKE FINISH CHESTPIECE AND EARTUBE, BLACK 27" TUBING	Each	160.00

3M™ LITTMANN® Cardiology S.T.C. Stethoscope

High-end auscultation with an innovative design and shape. Outstanding Littmann stethoscope acoustic quality offers excellent high and low frequency responses. The unique, oval, patented chestpiece shape is easy to grasp and allows easy movement between auscultation sites and also has a patient-friendly non-chill rim. Patented single-sided tunable diaphragm provides both high and low frequency responses. Dual lumen tubing helps to eliminate noise artifact. Anatomically correct headset. Soft, oval touch chestpiece grip eliminates friction interference sounds. 6-year warranty.

Cat No	Description	Pack	Price
4471	3M LITTMANN CARDIOLOGY STC, BLACK 27" TUBING	Each	155.00

3M™ LITTMANN® Cardiology III Stethoscopes

These stethoscopes are very innovative in auscultation technology. There are two patented tunable diaphragms, allowing you to listen to both low and high frequency sounds with either side of the chestpiece. The large side can be used for auscultating normal patients while the small side is especially useful with paediatric or thin patients. The smaller diaphragm can also be converted to a traditional bell by replacing with the non-chill rim (supplied). Double-lumen tubing enhances the acoustic sensitivity. 5-year warranty.

Cat No	Description	Pack	Price
3128	3M LITTMANN CARDIOLOGY III BLACK 27" TUBING	Each	138.00
3128BRS	3M LITTMANN CARDIOLOGY III BRASS FINISH CHESTPIECE AND EARTUBE, BLACK 27" TUBING	Each	138.00
3131BE	3M LITTMANN CARDIOLOGY III SMOKE FINISH CHESTPIECE AND EARTUBE, BLACK 27" TUBING	Each	138.00

3M™ LITTMANN® Master Classic II Stethoscopes

The portable high performance stethoscope. The 3M patented single-sided Master chestpiece allows the clinician to monitor both high and low frequencies by simply alternating the pressure applied to the chestpiece. Comfortable, durable and portable. 3-year warranty.

Cat No	Description	Pack	Price
2144L	3M LITTMANN MASTER CLASSIC II, BLACK 27" TUBING	Each	75.00

3M™ LITTMANN® Classic II S.E. Stethoscopes

The standard of the health care profession, features the 3M patented dual-frequency diaphragm, allowing the clinician to monitor both high and low frequencies by simply alternating the pressure on the chestpiece. This is a double-sided stethoscope with both a tuneable diaphragm and conventional bell mode. 3-year warranty.

Cat No	Description	Pack	Price
2201B	3M LITTMANN CLASSIC II SE, BLACK 28" TUBING	Each	57.50
2201BRS	3M LITTMANN CLASSIC II S.E. BRASS FINISH CHESTPIECE AND EARTUBE, BLACK 28" TUBING	Each	57.50

3M™ LITTMANN® Classic II Paediatric Stethoscopes

These stethoscopes are optimally designed for paediatric auscultation, with a 2.9cm dia diaphragm and 2.5cm dia bell. They are designed to offer the same high quality performance as the standard Littmann Classic II stethoscopes. 3-year warranty.

Cat No	Description	Pack	Price
2113	3M LITTMANN CLASSIC II PAEDIATRIC, BLACK 28" TUBING	Each	66.00

3M™ Littmann® Stethoscopes - Continued

3M™ LITTMANN® Classic II Infant Stethoscopes

These stethoscopes are optimally designed for infant auscultation with a 2.7cm dia diaphragm and 1.9cm bell. They are designed to offer the same high quality performance as the standard Littmann Classic II stethoscopes. 3-year warranty.

Cat No	Description	Pack	Price
2114	3M LITTMANN CLASSIC II INFANT, BLACK 27" TUBING	Each	66.00

3M™ LITTMANN® Select Stethoscopes

Designed to meet nurses' and technicians' daily auscultation needs. The Littmann Select stethoscope offers single-sided listening for both low or high frequencies. 2-year warranty.

Cat No	Description	Pack	Price
2290	3M LITTMANN SELECT, BLACK 27" TUBING	Each	36.00

3M™ LITTMANN® Lightweight II SE Stethoscopes

Designed to meet the needs of nursing professionals. An excellent, affordable choice for blood pressure and patient assessment. Provides clear, reliable acoustic performance through soft-sealing eartips and ovoid chestpiece for better orientation. Benefits from a tunable diaphragm for easy low- and high-frequency monitoring. 2-year warranty.

Cat No	Description	Pack	Price
2450	3M LITTMANN LIGHTWEIGHT II SE, BLACK 27" TUBING	Each	24.95

3M™ LITTMANN® Teaching Stethoscopes

This stethoscope is the same design as the Classic II SE, with two headsets joined to the chestpiece, for use in teaching applications where two people can hear the same sounds. 3-year warranty.

Cat No	Description	Pack	Price
2138	3M LITTMANN TEACHING, BLACK 27" TUBING	Each	89.00

Henley Stethoscopes

Disposable Stethoscopes are suitable for basic applications and help to reduce the risk of cross-infection.

Nurse-Style Stethoscopes are a cost-effective solution suitable for general use, available in either single- or dual-head.

Classic Stethoscopes are very high quality and suitable for a wide range of applications.

Sprague Rappaport Stethoscopes use a 2-in-1 tube system and are designed to detect the entire range of heart and chest auscultation.

Cardiology Stethoscopes are very high quality and designed to detect the entire range of heart and chest auscultation.

EN100 Wall-Mounted Combination Sets

The Heine EN100 is a modular wall unit which is supplied as standard with two instrument handles. The handles incorporate 3-metre spiral cords so they will stretch across most examination areas. They have a magnetic on/off system and their rheostats are conveniently positioned for ease of use. Instrument head locking collars are supplied to prevent the unauthorized removal of the high quality Kappa or Beta ophthalmoscope and otoscope heads that are supplied.

Choose between the competitively priced Kappa system or the specialists' first choice Beta system, whose ophthalmoscope comes complete with the patented Gullstrand Optical System that greatly reduces corneal reflex (glare or reflection) and allows for easier viewing through small pupils. Both systems are made in very strong ABS casing and have all the high quality aspects you would expect from a Heine product. These products are supplied complete with Heine's 5-year guarantee.

Cat No		Pack	Price

A-279 Combination Sets

Sets include a K180 Ophthalmoscope, a K180 Fibre Optic Oscope and one set of reusable tips, in a hard case.

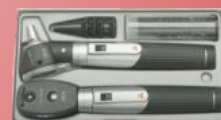

Cat No		Pack	Price
A27910118	A-279 SET WITH 2.5V BATTERY HANDLE	Each	269.00
A27920384	A-279 SET WITH 3.5V PLUG CHARGER	Each	564.80
A27920420	A-279 SET WITH 3.5V DESK CHARGER	Each	612.00

Mini Diagnostic Sets

Mini 3000 Heine Oscope sets are supplied complete with battery handle, 4 x reusable tips, 5 x 4mm and 5 x 2.5mm disposable tips. Sets also include a hard case. Heine otoscopes are light weight and have a 3 x magnification swivel viewing window. Mini 3000 Heine ophthalmoscope sets are also supplied complete with handle and hard case. Also available are combination sets which include an otoscope, ophthalmoscope and handle.

Cat No		Pack	Price
D85110021	MINI 3000 SET D-851 WITH FIBRE OPTIC OTOSCOPE	Each	135.00
D85210021	MINI 3000 SET D-852 WITH OPHTHALMOSCOPE	Each	142.00
D87311021	MINI 3000 SET D-873 WITH FIBRE OPTIC OTOSCOPE & OPHTHALMOSCOPE	Each	267.00

Retinoscope Sets

The most important feature of a retinoscope is the brightness of the fundus reflex it produces. To ensure the brightest streak possible, HEINE has combined the power of advanced 3.5V XHL xenon bulb technology, the latest in multi-coated optics, and an exclusive integrated polarizing filter (which eliminates all internal reflexes, stray light and secondary images without reducing illumination). The result - quick and easy detection of the neutralization point.

Key features include:

- 100% dust-proof housing
- Fixation card attachment
- Single control sleeve for vergence and rotation
- Heine XHL xenon lamp
- High quality multi-coated optics
- Supplied complete with spare bulb, handle and hard case

Cat No		Pack	Price
C3410118	BETA 200 STREAK RETINOSCOPE SET WITH 2.5V BATTERY HANDLE	Each	377.00
C3420384	BETA 200 STREAK RETINOSCOPE SET WITH 3.5V PLUG CHARGER	Each	552.20

Dermatoscope Sets

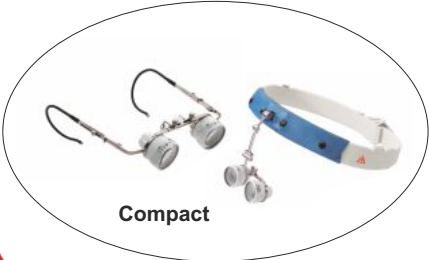

The original dermatoscope, Delta10, has evolved. The Delta20 is the next step in examination and photo-documentation of skin lesions. Features include Multi-LED illumination which is close to daylight, a high resolution precision optical system with extended field of view and a simple to use naturally positioned focus wheel. Each set includes head, power supply, contact plate, dermatoscopy oil and hard case.

Cat No		Pack	Price
K25610118	DELTA20 SET WITH 2.5V BATTERY HANDLE	Each	655.00

K0034205	CONTACT PLATE 8mm DIAMETER	Each	78.70

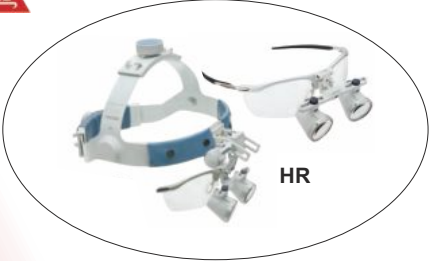

Binocular Loupes

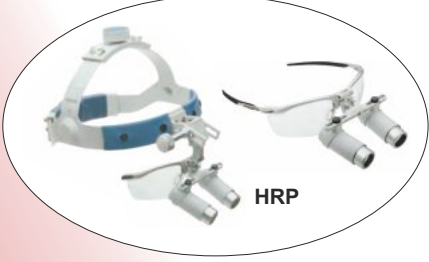

Heine Binocular Loupes set standards for innovative optics combined with high-tech materials and production techniques. Suitable for a wide range of applications in many disciplines, the use of magnifying loupes will increase visual acuity and reduce eye strain. Careful selection of working distance and correct viewing angle will avoid back and neck strain by allowing a comfortable working position. They are available in six styles (Spectacle Frame or Headband - Compact, HR and HRP) covering five different magnification levels (2x, 2.3x, 3.5x, 4x & 6x) and four different working distances (250, 340, 420 & 520mm). All Heine loupes offer an exceptionally wide deep field of view at high magnification. They are super lightweight and comfortable with precise controls for optic alignment.

Laryngoscopes

The Heine Classic+® range of reusable laryngoscopes incorporates their innovative HiLite® fibre-optic bundle, which has up to 6500 individual micro-fibres to improve light transmission and make the blade more resistant to autoclaving. With Classic+® there are no connecting screws to lose, no external light pathways and no tricky openings or crevices to get dirty - a major contribution to eliminating cross infection. They are compatible with all ISO7376 Green Standard handles and carry the Heine 5 year guarantee. Also available is the FlexTip+® blade, which is adjustable through 70 degrees.

Cat No		Pack	Price

Examination Lights

HL1200 Fibre-Optic Examination Lights

- 12V / 20W IRC reflector lamp with a 4000-hour life guarantees a long-lasting, bright, white light
- Generates 90000 lux light output at 30cm
- Long, flexible "goose-neck" arm swivels through 180°
- "Stay-put" construction of flexible section will not sag or droop in virtually any position
- Produces a lightspot ideal for most examining situations
- Ultra-slim illumination head with built-in temperature filter reduces patient discomfort and offers an unobstructed view for the examiner
- Available in black or white

HL5000 Fibre-Optic Examination Lights

- 12V / 50W halogen lamp with a 4000 hour life guarantees a long lasting, bright, white light
- Generates 140000 lux light output at 30cm
- Long, flexible "goose-neck" arm swivels through 180°
- "Stay-put" construction of flexible section will not sag or droop in virtually any position
- Produces a lightspot ideal for examining and recognising small details
- Compact illumination head with built-in IR filter and additional UV filter reduces patient discomfort and offers an unobstructed view for the examiner

HKL Fibre-Optic Examination Light

- Fibre-optic illumination provides a bright "daylight" illumination at 3800K
- Slimline head with adjustable diaphragm aperture offers an unobstructed view and a wide range of lightspot sizes
- Long, flexible "goose-neck" arm swivels through 180° and maintains position during examinations
- Several mounting styles are offered and the unit can be used with other major brand projectors, offering the most in flexibility and convenience

Headlights

3S LED Headlights

- Compact and lightweight (weighs only 70g), ensures user comfort even during long periods of use
- 3W super high output LED rated at 20000 hours operating life
- Generates 50000 lux light output (6250K) at 25cm, more than twice as bright as other standard LED and conventional headlights
- Available with mPack and Li-ion battery, which offers 10 hours operating time, or can be connected to mains power for unlimited operating time
- Continuously adjustable brightness control and spot-size iris aperture from 30 to 80mm field diameter at 420mm working distance

Heine Proctological Instrumentation

Disposable Sigmoidoscope, Anoscope & Proctoscope Tubes

Disposable - no cross-infection

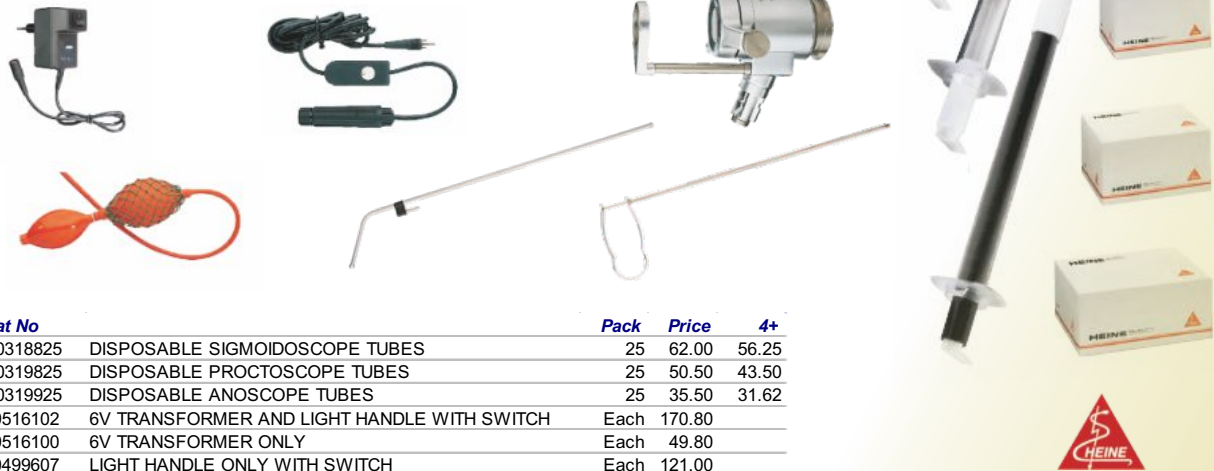

No cleaning time - saves time & expense

Moulded in patient-friendly thermoplastic - no cold sensation on insertion

Black sigmoidoscope insert - prevents light transmission through the tube wall

Distal annular light exit - bright, homogeneous illumination of the area examined, reflex reduction

Graduated in cm - indication of insertion length

FLA1

Disposable
Light Source

Fogless disposable proctoscopes are translucent and are available in large adult, adult and child sizes. They can be provided with or without disposable light source. If purchased without light source, then the FLA1 adaptor allows connection of a Welch Allyn light handle or the E0318101 light adaptor allows attachment of a Heine light handle.

The HFS1 is designed to fit between a sigmoidoscope light head and the dilating bulb. The hydrophobic media is 99.999% efficient and prevents flowback into the bulb and therefore helps prevent cross-contamination.

Optilube Lubricant

The OptiLube™ brand is a class IIa sterile lubricating gel, available in tubes, sachets and sterile-packed syringes. OptiLube™ is a water-based, water-soluble gel, which has a non-sticky, non-greasy formulation. OptiLube™ will not damage rubber or metal, is safe to use on human tissue and recommended for use with our proctological products.

OptiLube Active™ is a sterile lubricant gel containing local anaesthetic (Lidocaine) and antiseptics, with each syringe presented in a sterile package. OptiLube Active™ is used for the insertion of catheters and instruments into the body cavity. The gel provides optimum lubrication, whilst the local anaesthetic prevents pain and the antiseptic properties reduce the risk of infection.

For precise application. OptiLube Active™ sterile lubricating jelly is available in 6ml and 11ml pre-filled syringes. Each pre-filled syringe is sterile and individually wrapped in sterile packaging.

Parker Ultrasound Products

Parker is the world standard for medical ultrasound transmission.

AQUASONIC® 100 is the most widely used gel for diagnostic and therapeutic medical ultrasound. Recommended for all procedures where a viscous gel is required. The range includes 20g sterile sachets, 60g Doppler-size tubes, 250g dispenser tubes and the 5lt SONICPAC® complete with refillable dispenser.

Scan®

AQUASONIC CLEAR® Ultrasound Gel. Based on the same "can't be copied" formula of the world standard Aquasonic® 100 Ultrasound Transmission Gel, without fragrance or colour. For diagnostic and therapeutic medical ultrasound procedures.

SCAN®. Parker's exclusive dual-viscosity formula allows SCAN® to be applied as a gel and scan as a fluid. For medical ultrasound procedures when a less viscous gel is desired.

POLYSONIC®. Multipurpose ultrasound lotion with aloe vera, superior coupling efficiency in a pleasing cosmetic-quality base. Recommended for all ultrasound procedures when a lotion is preferred.

Aquasonic® 100

AQUAFLEX® Ultrasound Gel Pad. A 2 x 9cm aqueous, flexible, disposable ultrasound standoff for use in difficult-to-visualize and near-field areas, or when gels alone won't do. Disposability eliminates the risk of cross-contamination in diagnostic and therapeutic ultrasound procedures.

Aquaflex®

Eclipse®

ECLIPSE®. A soft, latex-free, disposable probe cover for medical ultrasound probes/transducers, pre-gelled inside with Aquasonic® 100 Ultrasound Transmission Gel. Fits most endocavity ultrasound probes.

Foetal Dopplers

UJ100S

UJ100S - Convenient, lightweight and easy to use, this homecare foetal heart monitor collects signals from the foetus and broadcasts via the headphones or loudspeaker. Sensitive to foetus of 12+ weeks, this unit can also transmit real-time heartbeat sounds to a PC or internal memory.

UJ100B - Lightweight, handheld and portable, this unit includes a 2/2.5Mhz waterproof probe which is sensitive to foetus of 12+ weeks. It has a large blue backlit LCD display and a clear built-in loudspeaker.

UJ100B

UJ200C

UJ200C - This digital foetal doppler includes a 2.2/3.3Mhz probe which can be selected according to different stages of pregnancy and is sensitive to foetus of 9+ weeks. With simple single-key operation, quality speaker and auto-charge & over-voltage functionality, this unit also includes a large capacity battery capable of 12hrs use on a single charge.

Low-Temperature Cauteries

Bovie manufacture four different cauteries specifically designed for ophthalmology. These patented Bovie RAM™ cauteries have an impressive four-year shelf-life and are quite simply the best cauteries ever made. With a variety of low temperatures and fine tips the surgeon is assured of precise pinpoint haemostasis. All disposable cauteries are individually packaged sterile, 10 per box. AAA90 has a one-year shelf-life due to use of AAA batteries.

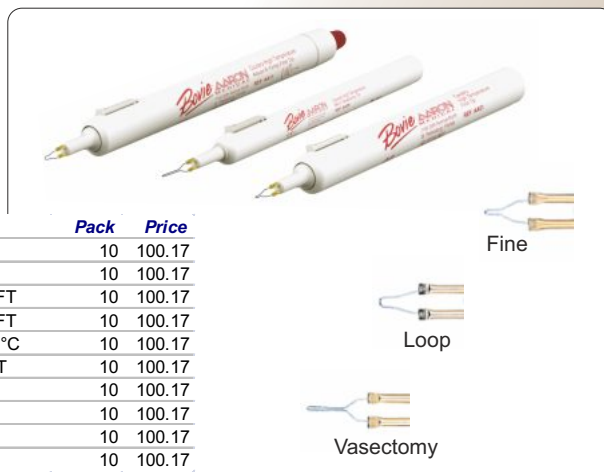

Cat No		Pack	Price
AAA00	BOVIE LOW-TEMPERATURE FINE-TIP CAUTERY 1300°F/704°C	10	71.92
AAA02	BOVIE ADJUSTABLE LOW-TEMPERATURE FINE-TIP CAUTERY 700-1200°F/371-649°C	10	100.17
AAA04	BOVIE LOW-TEMPERATURE ELONGATED FINE-TIP CAUTERY 1100°F/593°C	10	77.62
AAA90	BOVIE LOW-TEMPERATURE FINE-TIP MICRO CAUTERY 850°F/454°C	10	82.98

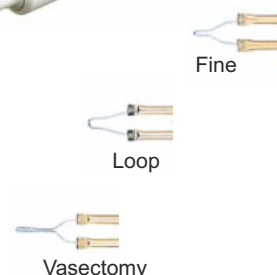

High-Temperature Cauteries

Bovie manufacture more cauteries than anyone in the world. Therefore, Bovie has the ability to put the right cautery in the physician's hand regardless of the procedure. High-temperature cauteries are popular for many types of procedure including pinpoint haemostasis, evacuation of a subungual haematoma, controlling diffuse bleeders, vasectomies and sculpting woven grafts. Individually packaged sterile, 10 per box.

Cat No		Pack	Price

Change-A-Tip Cauteries

These replaceable battery & tip cauteries are the next advance in battery operated cauteries where reusability is a must. These products are excellent for use in GP surgeries, theatres and accident & emergency departments for a wide variety of clinical procedures.

Handles

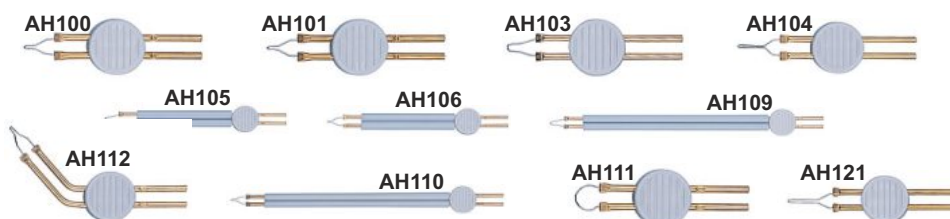

AHIT0 - Change-A-Tip™ low-temperature handle includes one AH100 non-sterile tip and one "AA" alkaline battery.

AHIT1 - Change-A-Tip™ high-temperature handle includes one AH101 non-sterile tip and two "AA" alkaline batteries.

Sterile Tips

Sterile tips include a sterile drape to cover the non-sterile handle. Tips are individually packaged 10 per box.

Deluxe Kits

ADEL0 - Change-A-Tip™ deluxe low-temperature cautery kit includes one low-temperature handle, two AH100 non-sterile tips, two AH104 non-sterile tips, one "AA" battery and a foam-lined case.

ADEL1 - Change-A-Tip™ deluxe high-temp cautery kit includes one high-temperature handle, two AH101 non-sterile tips, two AH103 non-sterile tips, two "AA" alkaline batteries and a foam-lined case.

Electrosurgical Pencils

Push Button

Rocker Button

Foot Switch

Reusable Push Button

Scratch Pad & Holster

- Button, rocker, and foot switch models
- Safety designed into every pencil
- Rock solid 3-prong connector
- Removable 2.3 mm (3/32") shaft electrodes
- Ergonomic design

All Bovie electrosurgical pencils feature removable stainless steel electrodes with standard 2.3 mm (3/32") shafts. They are provided with either a standard blade or needle electrode and a rock solid 3-prong connector. To give you the exact switching mechanism you desire, they are available in three versions: button, rocker, or foot-control (single-pin connector on foot-control model). A reusable version is available (AESPR) which can be autoclaved up to 40 times.

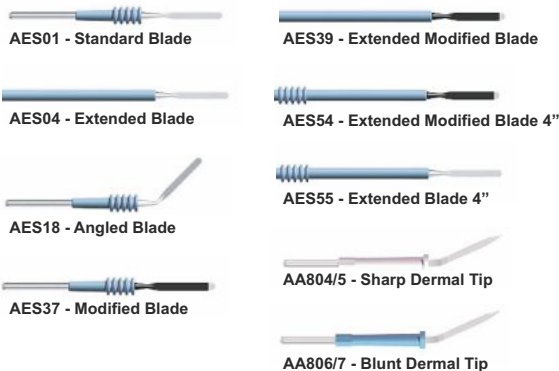

Ergonomically designed, each pencil gives you the balance and feel you demand, reducing stress and allowing you to concentrate on the procedure at hand.

Electrosurgical Disposable Electrodes

All Bovie disposable electrodes utilise the standard 2.3mm stainless steel shaft which fits most standard pencils. We stock flat blade, ball, and needle electrodes. All electrodes feature safety grip insulators combining patient and user safety with easy insertion and removal from the surgical pencil. Our electrodes are manufactured to the highest standard and are supplied individually sterile-wrapped.

Resistick II™ Coated Electrodes

Bovie Resistick II™ coated blade, ball and needle electrodes are expertly coated with PTFE (polytetrafluoroethylene). They move more effectively through tissue because they resist eschar build-up, making them much more efficient during surgical procedures. Just use a damp sponge or cloth to almost effortlessly clean the debris off the Resistick II™ electrodes. Resistick II™ electrodes are supplied individually sterile-packed in boxes of 12.

Cat No		Pack	Price

Tungsten Loop, Needle & Arthroscopic Electrodes

All the following Bovie electrodes feature tungsten for superior shape and integrity throughout the excision procedure. They use a standard 3/32" (2.3 mm) shaft. Disposable products are supplied sterile.

VesselPaws

Reliable atraumatic tissue occlusion - VesselPaws surgical clamp jaw covers provide simple yet effective vessel occlusion, with smooth constant pressure without aggravation and trauma to the vessel being clamped. Made from medical grade silicone, the serrated edges interface to provide smooth, steady, non-slipping tension. Vesselpaws are useful anytime a haemostatic clamp is used. Three colour-coded sizes are available, with each sterile pack containing two 5" lengths.

Cat No		Pack	Price	5+
00540	VESSELPAWS MINI RED	20	36.65	35.20

Suture-Boots

Instrument jaw covers facilitate grasping and tagging of sutures - Suture-Boots firmly hold the finest suture without damage or slippage. The radiopaque bright yellow colour provides immediate identification. Five pairs packaged sterile in convenient foam cartridges with pressure-sensitive, peel-off adhesive backing.

Features include

Cost effective pre-cut Suture-Boots eliminate the need to improvise with tubing, catheters or other unsuitable materials. Single-use. Fully tested.

Cat No		Pack	Price	5+
01211	VESSEL CARE SUTURE-BOOTS	250	174.50	167.50

Vesseloops

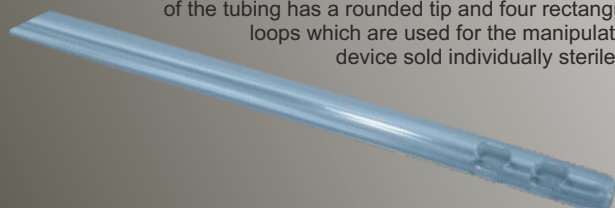

The original silicone loop. Vesseloops provide smooth vessel occlusion, retraction and identification during surgical procedures. Arteries, veins, tendons, nerves, spermatic cords and intestines are treated gently with a unique elliptical cross-section. Atraumatic Vesseloops are time-proven for reliability and ease of use. Vesseloops are totally non-absorbent and are ideal for a variety of surgical procedures, including: cardiovascular and thoracic surgery for occluding and identifying vessels; vascular surgery to control back bleeding; neurosurgery for occluding arteries in carotid endarterectomy and embolectomy; urological surgery for retracting and identifying ureters. Vesseloops, unlike clamps, do not pinch the vessel flat - a force that often contributes to trauma-provoked atheromas. Clamps can crack the intima, sometimes pulverising and dislodging plaque build-up. Pieces of dislodged plaque can possibly infarct distal organs. Vesseloops are the perfect blend of quick and easy application, coupled with dependable performance. Vesseloops come in three different cross-section sizes for flexibility. They are colour-coded and sterile-packed, two per package. 10 per box.

Snugger Venous Catheter

The venous catheter is a 190mm long, soft hollow tube manufactured from a medical grade polyvinylchloride (PVC). One end of the tubing has a rounded tip and four rectangular holes. The venous catheter is an accessory to vessel loops/silicone loops which are used for the manipulation and occlusion of blood vessels in thoracic surgery. It is a single-use device sold individually sterile-packed in packs of 100.

Arterial Embolectomy Catheters

ISOMed Embolectomy Catheters - single or double lumen - are made with X.R.O. PEBAX® and are colour-coded for easy identification. The balloon, fixed with two sutures, is perfectly symmetrical. Embolectomy catheters are graduated every 10cm from the distal end and reinforced with a removable steel wire. The balloon is protected from sunlight by an opaque sheath.

Nasal Cannula

All Salter Labs **Salter-Style**® nasal cannula are manufactured to the highest standard and offer an extensive range, including Original, Micro, Quiet and High Flow. As well as the Salter range Henleys are able to offer cost-effective alternatives for the more popular products.

Salter-Style® Original Cannula Features & Benefits (up to 3LPM or 6LPM)

- ⊙ Anatomically curved to fit upper lip - eliminates flap or ridge which can cause irritation
- ⊙ Curved, tapered nasal prongs - improved anatomical fit for increased comfort
- ⊙ Three-channel, crush-resistant safety tubing - uninterrupted flow of oxygen

Salter-Style® Micro Cannula Features & Benefits (up to 3LPM)

- ⊙ Unique patented, anatomically correct design - provides a natural fit for better comfort
- ⊙ Curved, tapered nasal prongs - better anatomical fit for increased comfort
- ⊙ Three-channel, crush-resistant safety tubing - uninterrupted flow of oxygen
- ⊙ The diminutive streamlined design and clear material is almost invisible on the skin - feather-light weight provides comfort and reduces behind-the-ear pressure

Salter-Style® Quiet Cannula Features & Benefits (up to 8LPM)

- ⊙ Incorporates a larger reservoir - virtually eliminates noise
- ⊙ Curved, tapered nasal prongs - better anatomical fit for increased comfort
- ⊙ Three-channel, crush-resistant safety tubing - uninterrupted flow of oxygen
- ⊙ Unique anatomically correct Salter-Style design - a more comfortable fit

Salter-Style® High Flow Cannula Features & Benefits (6 to 15LPM)

- ⊙ Delivers 6 to 15LPM - virtually eliminates the need to use face masks to achieve desired O₂ saturations
- ⊙ Special three-channel headset tubing with enhanced reservoir face piece - improves cannula high flow performance with quieter operation
- ⊙ Unique rectangular slide bolo - allows easy, secure adjustment and fit for optimum patient comfort
- ⊙ Seamless, extra soft, reservoir facepiece anatomically contoured to fit upper lip - provides long term wearability and patient comfort
- ⊙ Bright green supply tubing from the cannula to the oxygen source - visually alerts attending care givers that a high flow cannula is in use

Salter-Style® TLC Cannula Features & Benefits

- ⊙ **Salter-Style**® cannula with soft foam cushions placed over the headset tubing - increased patient satisfaction results in a reduction of patient visits
- ⊙ Cushions are installed during the assembly process - no assembly is required, means time saving for care giver and the cushions will not fall off
- ⊙ The TLC cushions move easily back and forth on the headset tubes - provides a more natural fit and reduces patient anxiety
- ⊙ Unique, patented, anatomically correct facepiece design - easy to find a comfortable fit and reduces unnecessary time-consuming service visits

Divided EtCO₂ Sampling & O₂ Delivery Cannula

Medical practitioners now have the timesaving convenience of two popular Salter Labs® products available in one overpack.

The Divided Cannula has all the patient comfort features of Salter-Style® cannulas plus a permanent barrier between the nasal prongs. This unique, patented design allows simultaneous oxygen delivery via one nasal prong and end-tidal CO₂ sampling from the other nasal prong. An added exclusive feature are the Salter Eyes® which are safety apertures to reduce possible occlusions. The cannula's innovative design gives end-tidal waveform monitoring quality equal to that obtained with intubated patients.

Two Tender Grip® skin fixation pads are included to provide secure positioning of the cannula face tubes. They may be easily placed to keep the tubing out of the surgical field area during ophthalmic or other surgical procedures. The individual pads are round and made of microporous tape, which readily adheres to the patient's skin. The clear overlap allows visual positioning of the cannula tube and has conveniently sized end tabs which aid in grasping when securing the tubing in place.

High Concentration Oxygen Masks

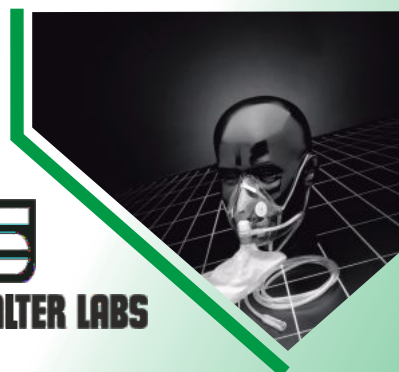

Our range includes both the superior quality partial and non-rebreathing masks from the world renowned US manufacturer Salter Labs, as well as our own economical range of non-rebreathing masks.

Typical features include

- Precision check valve on all non-rebreathing masks - assures correct oxygen concentration
- Soft anatomically formed PVC mask with securely anchored nose clip - better fit for long term users and edentulous patients
- Crush-resistant safety tubing - prevents occlusion of the oxygen supply
- Latex-free

SALTER LABS

Medium Concentration Oxygen Masks

SALTER LABS

Included within our range are the soft design Salter Labs over-the-ear and elastic band-style masks. We also offer Henleys economically priced masks in the elastic band style.

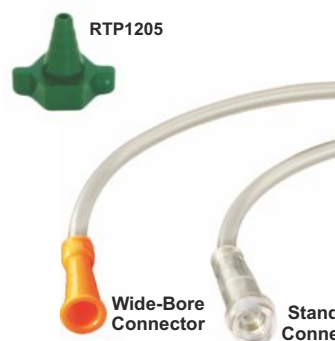

Features & Benefits

- Transparent masks with soft anatomical form - better fit for long term patients
- Salter adult masks available in over-the-ear style - fits comfortably over the ears. Eliminates need to move patient's head to apply. Useful for head, neck and spinal case patients
- Safety tubing as standard - prevents occlusion of oxygen supply
- Wide, adjustable elastic strap also available - fits comfortably below the ears to hold mask snugly in place
- Elastic strap ends sealed - precludes band from being pulled through mask

Pre-Filled & Refillable Molecular Humidifiers

Refillable

Our refillable Humidifier is an inexpensive alternative to pre-filled. Ideal for general ward use. This product includes a pressure relief valve which will pop off at 2PSI back pressure, 500cc jar, universal tapered oxygen outlet, clear easy-to-read graduated markings and shatterproof plastic design.

Our Pre-filled Humidifiers are self-standing and will support a flowmeter. The patented "Dual Chamber" design eliminates the need for overflow spill tubes, as it reduces rainout by remaining in the bottle, not the tubing.

Pre-Filled

Cat No		Pack	Price	10+
RTP0352	PRE-FILLED STERILE WATER WITH ADAPTOR 300ml	20	44.25	42.25
RTP0552	PRE-FILLED STERILE WATER WITH ADAPTOR 500ml	12	43.00	41.00

25440	METAL FLOW METER ADAPTOR	Each	5.55	

Humidification Chamber

Designed to slide easily into Fisher & Paykel and Vital Signs heater bases. Incorporates an aluminium heat plate which uniquely directs the heat into the water chamber, resulting in higher humidification. The directional inlet flow tube optimises surface vaporisation. This product is single-patient use only.

Cat No		Pack	Price	10+
RTP1141	LOW-VOLUME CHAMBER WITH AUTOFEED, INCL. TRANSFER SET	40	325.00	314.00

Salter AIRE Plus® Compressors for use with Drug Nebulizers

The Salter AIRE Plus® is a lightweight, portable, quiet compressor for powering aerosol generating medication nebulizers. It is engineered for long-term durability and cost-effectiveness. The flow outlet fitting, fresh air inlet filter and rocker-style on/off switch are recessed to protect from accidental breakage. There is a convenient built-in hand-grip for easy transport. A unique, tip proof nebulizer docking port is built into the case which will accept most medication chambers available on the market today. An optional handy travel bag with extra storage for nebulizer kits is available, making this machine equally suitable for home use.

Specifications
Salter AIRE Plus®, Model SO1774GN Compressor

Size:	17 cm x 14.5 cm x 11.2 cm (6.7" L x 5.7" W x 4.4" H)
Weight:	2.1kg (4.6 lbs.)
Electrical requirements:	230 V, 50 HZ, 1.9 A
Compressor:	Oil-free cast aluminum alloy integrated uni-piston
Replaceable, external filter:	White, open cell foam
Free Flow	10 LPM, minimum
Litre Flow	6 LPM, minimum through a Salter Labs nebulizer
Pressure	25 PSI, minimum

SALTER LABS

Features

- Efficient aerosol delivery
- Solid state components, 5 year warranty
- Lightweight, compact
- Piston-style compressor
- Quiet, low noise level
- Nebulizer docking port

Benefits

- Shorter treatment time, less wasted medication
- Durable & reliable
- Easy to carry, 2.1kg (4.6 lbs.)
- Assures strong, steady pressure and flows
- Provides unobtrusive treatment
- Added safety and convenience

Salter AIRE Plus® Compressors are supplied complete with one hand held nebulizer kit, Cat No 8900S.

Salter 8900 Small Volume Drug Nebulizer

The Salter Labs® 8900 Small Volume Jet Nebulizer is a versatile, high performance jet nebulizer which delivers reliable and cost-effective aerosol therapy. Ideally suited for hospital or home therapy. Unique design allows 3cc medication delivery in seven minutes or less, even when held at an angle. The Salter Labs® 8900 Small Volume Jet Nebulizer also works well in ventilator circuits.

Features

- Nebulizes 3cc within 7 minutes or less at 7 LPM
- Nebulizes in horizontal or vertical position
- Larger surface area provided by unique convex cone design
- Removable green convex cone
- Scalloped, bottom cuff design
- One-eighth turn screw on cap
- Anti-drool "T"

Benefits

- Shortened treatment times
- Allows patient to be in a comfortable position for treatment
- Maximum capillary action eliminates medication waste
- Easy to see, and allows for thorough jet cleaning and reassembly
- Allows the unit to stand alone; simplifies tube attachment
- Easy to assemble and disassemble, provides a leak proof seal
- Prevents medication contamination from patient saliva

SALTER LABS

Cat No	Salter series 8900 nebulizers	Pack	Price
8900	SALTER SERIES 8900 NEBULIZER WITH TEE, 150mm (6") RESERVOIR TUBE, MOUTHPIECE & 2.1m (7ft) SAFETY TUBING	50	49.50

Salter NebuTech HDN Small Volume Drug Nebulizer

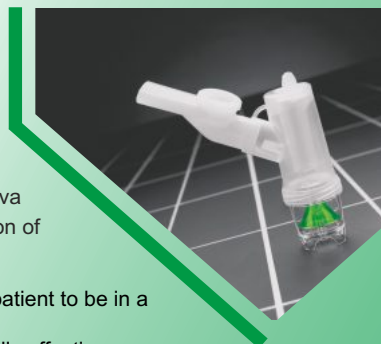

Both the single-patient use and the reusable version provide a 50cc bolus at the beginning of inspiration. Continuous flow delivers additional medication through the inspiratory cycle. The unique valve system allows re-charge of the medication bolus during exhalation phase with minimal medication waste.

Features

- Integral anti-drool feature incorporated
- Patented cone design with larger surface area coupled with more efficient flow-through chamber
- Nebulizes 3cc within 7 minutes or less at 7 LPM in horizontal or vertical position
- Particle size distribution within the desired respirable range. 80% below 5 microns
- Incorporates one-way valves at the inlet and outlet paths
- Removable green convex cone

Benefits

- Prevents medication contamination from patient saliva
- Provides maximum capillary action. Better evacuation of medication through the nebulizer
- Reduced treatment time with higher output. Allows patient to be in a comfortable position for treatment
- Improved deposition with peripheral airways. Clinically effective therapy
- Provides minimal loss of costly medication during the non-inhalation phase
- Allows easy cleaning and reassembly

Aerogard II Downdraft Filtered Drug Nebulizer System

The Aerogard II Downdraft Filtered Nebulizer System effectively administers aerosolised medication and helps to avoid environmental contamination. The innovative design of the downdraft nebulizer is the core of its ability to perform these tasks. The bacterial/viral filter prevents the exhalation of contaminants generated by the patient. This filter has been tested and shows a >99.99% filtration on bacteria and >99.6% on viruses. The flexible corrugated tube joins both one-way inspiration valves. The valves and reservoir together contain the aerosolised medication in suspension once the patient has inhaled. The Aerogard II also features three one-way valves, one exhalation valve and a mouthpiece.

Cat No	Pack	Price	10+
RTP4430 AEROGARD II FILTERED NEBULIZER SYSTEM	20	130.00	127.50

Aquineb Updraft Drug Nebulizer

The Aquineb updraft nebulizer is designed to deliver the most therapeutic particle size and effectively nebulize at the lowest possible flow rate. Designed to work at 90° with a consistent output of 6-7LPM. This product is spill proof.

Cat No	Pack	Price	10+
RTP4110A AQUINEB DRUG NEBULIZER ONLY	50	21.50	20.50
RTP4317A AQUINEB NEBULIZER, ADULT MASK & TUBING	50	53.00	51.00

AeroEclipse II Breath-Actuated Nebulizer (BAN)

The AeroEclipse II Breath Actuated Nebulizer (BAN) creates aerosol only in response to the patient's inspiratory flow. Unlike continuous mode nebulizers, with AeroEclipse II virtually no drug is lost to the environment, and there is reduced transmission of airborne pathogens. Supplied with mouthpiece, tubing and patient instructions.

Cat No	Pack	Price
RTP91050 AEROECLIPSE II BREATH-ACTUATED NEBULIZER	Each	6.20

AeroChamber MV Holding Chamber

The AeroChamber MV Holding Chamber is specifically designed to deliver aerosol to mechanically ventilated patients. It is designed for use via resuscitation bag or ventilator circuit through the tracheal or endotracheal tube.

The unique valve and baffle system found in the AeroChamber MV ensures optimum fine particle aerosol delivery from pressurized metered dose inhalers (pMDIs).

Cat No	Pack	Price
RTPACM AEROCHAMBER MV HOLDING CHAMBER	Each	6.50

AeroTrach Plus Valved Holding Chamber

The AeroTrach Plus Valved Holding Chamber is specifically designed to deliver aerosol to spontaneously breathing tracheostomy patients. The anti-static chamber minimizes static charge and increases the suspension time of the particles to provide consistent medication delivery – right out of the package. The connection has been designed to connect quickly and easily to typical 15mm adapters.

The unique valve and baffle system found in the **AeroTrach Plus VHC** ensures optimum fine particle aerosol delivery from pressurized metered dose inhalers (pMDIs). The durable inhalation valve features a protective design for low resistance and superior responsiveness, which ensures that even the smallest inspiratory effort will be rewarded.

Cat No	Pack	Price
RTPATP AEROTRACH PLUS VALVED HOLDING CHAMBER	Each	12.00

AeroChamber Mini

The **AeroChamber Mini** Aerosol Chamber (AC) is a unique new device designed to deliver pressurized Metered Dose Inhaler (pMDI) medication to patients requiring assisted ventilation within a hospital environment.

AeroChamber Mini is ergonomically designed to fit comfortably in your hand. When used in a ventilator circuit, it can be easily connected to the endotracheal tube in front of the "Y" or HME.

Cat No	Pack	Price
87591010 AEROCHAMBER MINI AEROSOL CHAMBER	Each	17.70

Aerosol Masks & Face Tents

Features & Benefits

- Soft, clear aerosol mask with anatomical fit - Ideal for long-term users or edentulous patients
- Exceptionally comfortable for even hard-to-fit faces - Maintains proper positioning
- Clear, soft face tent with wide, adjustable elastic strap - Provides an oxygen- or aerosol-rich environment. More comfortable fit.

Cat No	Salter Aerosol Mask & Face Tent	Pack	Price	10+
8000	ADULT OVER-THE-EAR	50	29.50	29.00

RTP7003A	ADULT AEROSOL MASK	50	26.50	25.50

SALTER LABS

Incentive Spirometry & Accessories

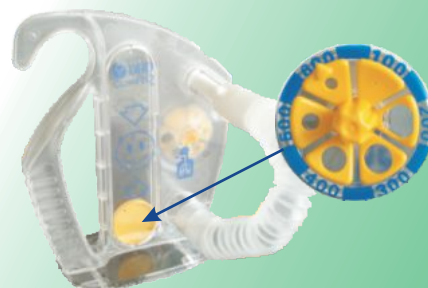

RTP7000 - The Mediflo Duo is a dual-use incentive spirometer that can be used for both sustained maximal inspiration (SMI) and positive expiratory pressure (PEP) simply by turning the product round and re-attaching the corrugated tubing. During SMI the flow regulation lid allows the unit to be adjusted according to the patient's functional capacity, giving a sense of achievement and increased compliance. Low output values for flow and breathing effort (200ml/sec). During PEP, slow exhalation against resistance of approx 15-20cm H₂O increases intrapulmonary pressure, expands the bronchial system, encourages the transport of secretions by means of bronchial calibre fluctuations and assists treatment of pulmonary emphysema. Clear indication of correct pressure. Flow regulation via metering lid.

Cat No	Pack	Price	10+
RTP7000	MEDIFLO DUO INCENTIVE SPIROMETER WITH PEP	20 106.00	105.00

RTP221200 - The Cliniflo is ideal for SMI treatment in elderly, paediatric or weakened patients. With flow setting as low as 100ml/sec, virtually any patient can sustain the minimum inspiratory effort required for effective therapy. Slow inspirations enhance collateral ventilation, and minimise patient discomfort when performing post-surgical breathing exercises. To adjust the flow rate on Cliniflo, simply rotate the dial on the back of the unit until the arrow points to the desired flow rate. The dial is located on the back so the patient is not tempted to change it to a higher flow rate. A port is provided for easy provision of oxygen during therapy. Cliniflo is supplied with pre-assembled popple tubing, mouthpiece and instructions.

Cat No	Pack	Price
RTP221200	CLINIFLO LOW FLOW BREATHING EXERCISER	12 54.00

RTPTB - Tri-Ball Incentive Spirometer, or Respiratory Exerciser, helps the patient to recover normal respiration following chest or abdominal surgery. TriBall has 3 chambers - 600, 900 and 1200cc per/sec. Convenient holders for both tubing and mouthpiece.

Cat No	Pack	Price	10+
RTPTB	TRI-BALL 3 BALL INCENTIVE SPIROMETER	12 40.95	38.95

1510002001 - Respirogram Incentive Spirometer is typically used post surgery. Features include three colour-coded balls, a filter and mouthpiece holder.

Cat No	Pack	Price	50+
1510002001	RESPIROGRAM INCENTIVE SPIROMETER	Each 4.95	4.75

RTPSB - Spiroball Adult Volume Incentive Spirometer 500-4000ml.
RTP259000259 - Spiroball Paediatric Volume Incentive Spirometer 500-2500ml.

The inspiratory flow indicator allows the patient to maintain appropriate flow rates. A scale on both sides of the unit allows visual inspection of inspired volume. Convenient holders for mouthpiece and tubing.

Cat No	Pack	Price	10+
RTPSB	SPIROBALL INCENTIVE SPIROMETER WITH VOLUME INDICATOR 500-4000ml ADULT	12 59.00	57.00
RTP259000259	SPIROBALL INCENTIVE SPIROMETER WITH VOLUME INDICATOR 500-2500ml PAEDIATRIC	12 66.00	63.00

Respivol Incentive Spirometer for Sustained Maximal Inspiration (SMI). Specially designed for the respiratory rehabilitation of patients affected by COPD or with severely compromised respiratory function. Available in adult (250-5000ml - Green) and paediatric (150-2500ml - Blue). Sliding indicators can be used to monitor achieved volumes.

Cat No	Pack	Price
1510007001	RESPIVOL INCENTIVE SPIROMETER 250-5000ml	Each 8.00
1510008001	RESPIVOL INCENTIVE SPIROMETER 150-2500ml	Each 8.00

EzPAP® Positive Airway Pressure System

Lung expansion therapy to prevent or reverse atelectasis

When incentive spirometry alone won't open patients' airways, consider EzPAP® as your next option. It makes providing positive airway pressure positively easy.

Simply connect to a flow meter (wall air or O₂ for enhanced FiO₂), adjust to 5-15 lpm, and instruct the patient to breathe diaphragmatically through the mouthpiece or mask. No equipment to roll around. No labour-intensive CPT. No extensive training. Just a few minutes as prescribed—not for hours at a time.

EzPAP® features a pressure port for connection to a gauge (recommended for initial use with each patient), and a standard 22mm OD fitting to accommodate a mouthpiece or 3 mask options. The EASY option for atelectasis. Try it once and you'll understand.

Easy to meet individual patient needs

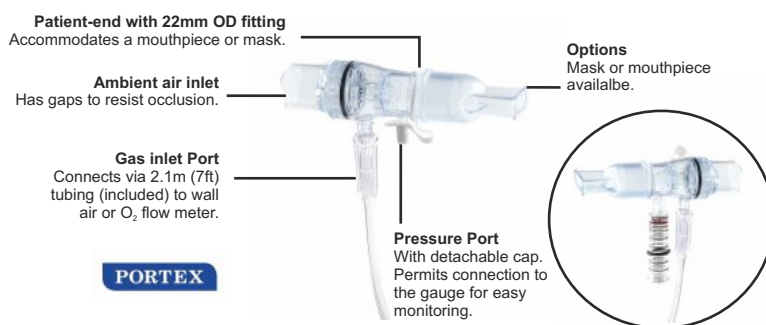

While monitoring with a gauge, slowly adjust the flow meter until the desired airway pressures are reached.

Slow inhalations and exhalations should maintain adequate airway pressure throughout the breathing cycle.

The EzPAP® Positive Airway Pressure System includes the EzPAP® lung expansion device, mouthpiece or cushion mask, pressure port cap, and 2.1m (7ft) of tubing.

Also available with pressure gauge.

EzPAP® Features:

Cat No		Pack	Price
RTP230747	EzPAP WITH MOUTHPIECE	Each	17.25
RTP232747	EzPAP WITH MEDIUM CUSHION MASK	Each	23.00
RTP230757	EzPAP WITH MOUTHPIECE AND PRESSURE GAUGE	Each	21.50

TheraPEP® Positive Expiratory Pressure Therapy System

Improving quality of life

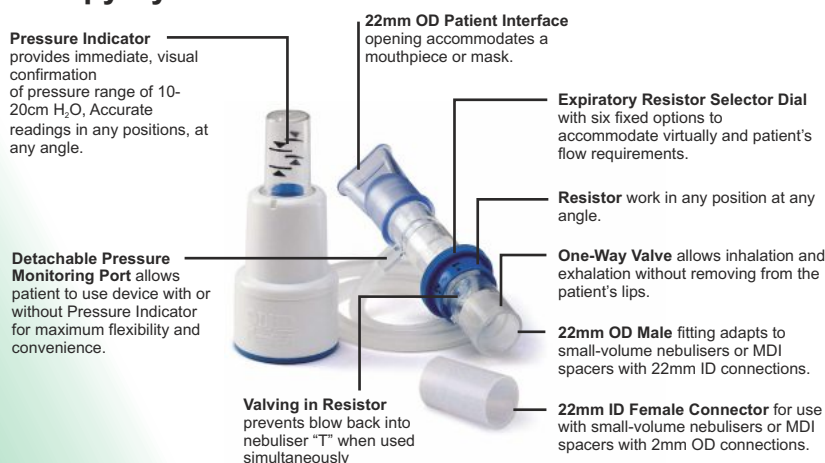

The TheraPEP® System is the proven choice for secretion clearance and reversal of atelectasis^{1,2}

TheraPEP® PEP Therapy System is the easy-to-use system for mobilising secretions in patients with cystic fibrosis (CF), lung diseases with secretory problems and to prevent or reverse atelectasis, as well as patients recovering from surgery.

Designed for positive expiratory pressure therapy and simultaneous aerosol drug delivery, the TheraPEP® System can help virtually any patient mobilise secretions easily, conveniently, and cost-effectively.

Positive expiratory pressure (PEP) therapy with TheraPEP® PEP Therapy System, unlike labour-intensive, time-consuming chest physiotherapy (CPT), can be self-administered by the patient in any setting, helping patients maintain an effective continuum of care outside the hospital. The TheraPEP® System may reduce the need for postural drainage and percussion, and can be performed in less than half the time of a conventional CPT session.³ This offers significant time savings for both patients and clinicians.

The TheraPEP® System is even more efficient when used with a medication nebuliser or MDI spacer. The patient can receive aerolised medication, and perform therapy for secretion clearance and atelectasis, in the time of one treatment. PEP therapy may also optimise delivery of bronchodilators in patients receiving bronchial hygiene therapy.⁴ No other secretion clearance device offers you a better combination of therapy, flexibility and efficiency.

Features

- Six fixed orifice options.
- Built-in durable pressure indicator.
- 22mm OD patient end.
- Inspiratory valve.

Benefits

- Can accommodate virtually any patient's lung capacity.
- Resist breakage, unlike fragile, costly manometers.
- Provides immediate, visual 360° feedback of prescribed pressure.
- May be used with a mask, mouthpiece or nebuliser.
- Allows inhalation and exhalation with removing form mouth.

Cat No		Pack	Price
RTP201112	THERAPEP THERAPY SYSTEM	Each	22.50

1. McIlwaine PM, Wong LT, Peacock D, Davidson GF. Long-term comparative trial of conventional postural drainage and percussion versus positive expiratory pressure physiotherapy in the treatment of cystic fibrosis. J Pediatr. October 1997.
2. Protocol of the Month, University of Pittsburgh Medical Center, Department of Respiratory Care. AARC Times, May 1997.
3. Mahmeister MJ, Fink JB, Hoffman GL, Fifer LF. "Positive-expiratory-pressure mask therapy: Theoretical and Practical Considerations and a Review of the Literature", Respiratory Care, 1991;36:1218-1230.
4. "AARC Clinical Practice: Use of Positive Airway Pressure Adjuncts to Bronchial Hygiene Therapy", Respiratory Care, 1993;38:516-521.

Palm Cups® Manual Percussors

Palm Cups are used during physiotherapy to percuss the chest wall to mobilize the secretions within the bronchial tree. They help provide uniformity and consistency from one user to the next. Primary patients are those with cystic fibrosis, chronic bronchitis and pneumonia. Neonatal and pediatric sizes are packaged individually. Medium and large sizes are packaged in pairs.

Benefits

- Patient comfort.
- Reduces stress on caregivers' joints.
- Provides consistent performance.
- Can accommodate virtually all patients.

PEP/RMT™ Multi-Application Respiratory Training Device

Pep/Rmt™ is a simple, easy-to-use training kit designed to improve patient respiratory performance. Choosing from a combination of masks, resistors and other options, you can configure a respiratory training or symptom-minimising tool that can be used in the clinic or at home. Pep/Rmt can be tailored for four specific therapies covering the full range of patient categories.

- Simple to use and adjust for patients and health care professionals alike
- Multiple scaling options allow you to adjust parameters as patient condition changes
- Quick set-up and breakdown
- Documented effectiveness¹⁻⁴

PEP to normalise reduced lung volumes

PEP can be used to normalise reduced lung volumes which can occur as a result of immobilisation, anaesthesia/surgery and neurological diseases.

PEP to normalise increased lung volumes

PEP can be used to reduce excessive functional residual capacity as in the case of severe stages or exacerbation in obstructive pulmonary disease.

Four respiratory therapies

from a single source

Inspiratory muscle training

IMT can be used to exercise strength and endurance in the inspiratory muscles in patient groups with impaired muscle function, as in chronic obstructive pulmonary disease (COPD) and various neurological diseases. It is also used to lower the risk of postoperative lung complications in patients undergoing heart surgery and for athletes to increase performance.

Secretion elimination with PEP and HiPEP

PEP can be used in the case of increased secretion in the airways, as in cystic fibrosis and COPD and in the case of infection in people with multiple severe disabilities. HiPEP is a method for eliminating secretion from the airways using forced exhalation against an expiratory resistance to residual volume.

Cat No	Pack	Price
H71100	PEP/RMT SET SIZE INFANT WITH 8 RESISTORS, VALVE AND CASE	Each 112.00
H71101	PEP/RMT SET SIZE CHILD WITH 8 RESISTORS, VALVE AND CASE	Each 112.00

Acapella® Vibratory PEP Therapy System

Acapella® combines the benefits of both PEP therapy and airway vibrations to mobilize pulmonary secretions and it can be used in virtually any position, whether reclining, standing or sitting.

It improves clearance of secretions, is easier to tolerate than CPT, takes less than half the time of conventional CPT sessions* and facilitates opening of airways in patients with lung diseases with secretory problems (COPD, asthma, cystic fibrosis). Colour-coded units (green for high-flow, blue for low) help customize treatment based on clinical needs. You can adjust Acapella's frequency and flow resistance simply by turning an adjustment dial.

* Mahimeister MJ et al. "Positive-expiratory pressure mask therapy: Theoretical and Practical Considerations and a Review of the Literature", *Respiratory Care*, 1991.

Product Features

- Colour-coded.
- Blue-DM <15 lpm for 3 seconds.
- Green-DH >15 lpm for 3 seconds.
- Inspiratory Valve.
- 22mm OD ambient end.
- 22mm OD patient end.
- Expiratory resistance dial.
- Patented rocker mechanism.

Product Benefits

- Can accommodate virtually any patient's lung capacity.
- Allows inhalation and exhalation without removing from mouth.
- May be used with mask or mouthpiece nebulizer.
- Can accommodate virtually any patient's lung capacity. Reproducible therapies.
- Use in any position - patient is free to sit, stand or recline.

Acapella® Choice Vibratory PEP Therapy System

Like the original Acapella®, Acapella® Choice can be used in virtually any position to open airways and mobilize secretions. What's more, it disassembles into four, easy-to-clean parts that withstand autoclaving, boiling and dishwashing. Your patients get all the benefits of vibratory PEP therapy, in the home or hospital, with a convenient, easy-to-clean device (single-patient use).

Product Features

- Works in virtually any position.
- Patients may inhale through device.
- 22mm fitting for use with mouthpiece.
- Can be boiled or autoclaved.
- Adjustable frequency with numbered dial.

Product Benefits

- Versatile for use by virtually all patients.
- Easy to clean.
- Enables reproducible therapies.

Acapella® Duet Vibratory PEP Therapy System

The Acapella® Duet is a smart, convenient addition to the popular Acapella® family. The benefits of vibratory PEP therapy have been well documented, and now medication can be delivered simultaneously, saving time and effort for both clinicians and patients.

Engineered with a built-in port for aerosolised medication via a small volume nebulizer, Acapella® Duet allows convenient administration of bronchodilator or mucolytic treatments concurrently with vibratory PEP therapy, without the need for a tee adaptor.

Convenient, versatile and smart

Having two therapies — vibratory PEP and nebulized medication — together in one lightweight, compact device helps to further establish Smiths Medical as a leader in providing high-quality, innovative and cost-effective devices for respiratory care.

Product Features

- Vibratory PEP therapy and nebulization in one device saves time, effort and cost.
- Easily disassembled and reassembled for effortless and thorough cleaning by boiling, autoclaving or in the dishwasher (top rack only).
- Can be used by the patient in any position — reclining, standing or sitting.

Pulmonary Function Filters

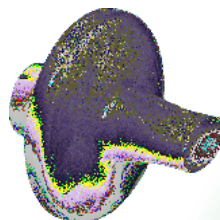

Pulmonary function filters help to prevent the risk of bacterial and viral colonisation in equipment, protecting patients from cross-contamination. The membrane's intrinsic hydrophobic content prevents condensation from forming, and the filtering diaphragm's low flow resistance does not affect established respiratory parameters.

Specifications

Warm-up time	None required
Display range	0-100% Oxygen
Accuracy	< ± 1% full scale range under constant conditions
Response time	99% of final full scale reading in 9 secs
Sensor life	60 months in air at 25°C and 1 atmosphere
Power supply	2 x AA Alkaline batteries, 1200 hrs continuous use
Temp range	5°C - 45°C
Calibration	Air or certified O ₂ every 8 hrs; time 90 secs
Compensation	Temperature compensated
Connections	1x16mm thread or push-in flow diverter with o-ring seal

Area classification	General purpose
Dimensions	90 x 150 x 40mm
Display	3-½ digit backlit LCD 68x38mm
Display resolution	0.1% O ₂
Flow sensitivity	None between 0.2 to 10LPM
Humidity	Non-condensing 0-95% RH
Linearity	±1% under constant conditions
Pressure	Inlet - ambient; vent - atmosphere
Sensitivity	< 0.5% of full scale range
Signal output	None
Storage temp	-20°C to 60°C on intermittent basis

PVC Feeder Bib

'Heidi' Drinking Beakers

The lid of the 'Heidi' Drinking Beaker is specifically designed for those patients who have difficulty or find it impossible to take fluids from a conventional cup.

- The unique design of the beaker lid reduces dribble - thus giving the patient more confidence and comfort
- The liquid flow can be regulated, if required, by simply covering a hole on the lid with a finger. This can also allow the use of a straw
- Ideal for nursing staff or attending relatives to administer fluids to patients who cannot help themselves
- Helps to re-educate patients to drink from a cup
- Manufactured from shatterproof polypropylene
- Tight-fitting lid will not come away from beaker but can be removed for cleaning
- Translucent in design for easy visual inspection of contents
- Can be autoclaved or boiled
- Graduated markings every 50ml up to 200ml capacity

Cat No		Pack	Price
115116PP	HENLEY FEEDER BEAKER "HEIDI" PATTERN TRANSLUCENT	Each	1.34

Standard Drinking Beakers

Our standard beakers can be supplied complete with lids or can be purchased separately. All types use the same 116PP beaker so that lids can be interchanged. We offer two types of lids, Wide Spout and Narrow Spout. Both lids have a small hole to allow the user to easily control the flow of fluid. These products are translucent in design for easy visual inspection of contents. They are autoclavable, can be boiled and are microwave safe. The tight-fitting lids ensure that there is little risk of major spillage. Our feeder beakers include clear markings graduated every 50ml up to the 200ml capacity.

Poly Overshoes

Deluxe Embossed Sole

Deluxe Smooth Sole

Slip Resistant

CPE

PVC Overshoes

Pal Deluxe Overshoes are manufactured from a strong and durable nonwoven fabric. They are a higher specification alternative to CPE overshoes, designed for extra comfort and suitable for more sensitive areas such as laboratories or for visitors to hygiene-sensitive areas. They are available in either white or blue, with either a smooth sole or embossed sole for extra grip. One size fits all.

Pal Slip-Resistant Overshoes have been developed specifically to provide the user with maximum grip under both wet and dry conditions. Friction-tested on a variety of floor surfaces including clay tiles, vinyl tiles, polished wood and carpet, these overshoes are independently certified as slip-resistant. They are made from a durable non-woven upper with an elasticated ankle and embossed latex/PE sole offering durability, comfort and grip. They are available in white with blue soles and one size fits all.

PVC Overshoes are manufactured from high quality white anti-static PVC. The semi-disposable design makes these overshoes particularly suitable for tougher application, and being reusable they are an excellent choice for a wide range of tasks where durability is important. PVC Overshoes are available in two sizes and are machine- or hand-washable.

Pal CPE Overshoes are made from a high quality embossed polythene, providing strength and grip on slippery floors. They come large as standard but are also available extra-large. CPE overshoes are manufactured with elasticated ankles to ensure a good fit. They are suitable for protecting floors and footwear, ensuring environmental hygiene in a range of applications. They are available in four colours.

Gloves

Vinyl gloves are manufactured to 4 AQL from high quality vinyl. Beaded cuffs provide strength and help prevent tearing. They are available pre-powdered to aid application, absorb perspiration and increase user comfort, or powder-free for those with related allergies. Produced in clear vinyl, available in four sizes and supplied in a convenient dispenser box.

Latex gloves are manufactured to a medical grade standard at 1.5 AQL. They are natural-coloured with a beaded cuff to prevent tearing. They are available either pre-powdered for ease of application and to help absorb perspiration, or powder-free for use in highly controlled environments. They are produced in various sizes and are supplied in a convenient dispenser box.

Nitrile gloves are manufactured to a medical grade 1.5 AQL standard. They are a great alternative to latex gloves in almost all environments, offering high dexterity and durability with excellent resistance to oils, acids and other chemicals. They are powder-free and latex-free. They are produced in four sizes, coloured blue and supplied in convenient dispenser box.

Polythene gloves offer safe, low-allergy protection for a variety of tasks. These low cost disposable gloves are powder-free, lightweight and available in medium and large sizes. They are supplied in convenient bags of 100.

Astro Cap

Pal Astro Caps provide full head coverage for a high level of hygienic barrier protection. They are made from soft spun-bond non-woven material with an elasticated brow and neck to ensure comfort and fit. The cap includes an attached 3ply non-woven facemask that complies with Bacterial Filtration, EN 14683:2005. It also features an encapsulated metal nose clip for additional comfort and barrier protection. The caps are available in white and one size fits all.

Synthetic Polyester Fleeces

Synthetic Polyester Fleeces with a 27mm-pile depth are a cost-effective alternative to a natural fleece. They are non-allergenic, non-toxic and comply with BS4578 for air permeability. They are also flame-retardant.

Synthetic Polyester Fleeces are machine- and hand-washable.

<i>Cat No</i>		<i>Pack</i>	<i>Price</i>
H220	SYNTHETIC FLEECE 18x20" (45.7x50.8cm)	Each	6.92
H221	SYNTHETIC FLEECE 14x18" (35.6x45.7cm)	Each	5.69

H225	SYNTHETIC FLEECE 60" WIDE (152.4cm)	Metre	28.78

Real Lambswool Fleeces

Natural Lambswool Fleeces are soft, springy, resilient and typically have a pile depth of around 25mm. They absorb perspiration, which helps to keep the patient dry and comfortable.

Natural Lambswool Fleeces are machine- and hand-washable. We recommend that they are brushed with a fine comb for maximum softness.

<i>Cat No</i>		<i>Pack</i>	<i>Price</i>
H222LW	REAL LAMBSWOOL FLEECE 27 X 30" (68.6x76.2cm)	Each	14.37
H224LW	REAL LAMBSWOOL FLEECE 27 X 60" (68.6x152.4cm)	Each	26.61

Cushions

Our range of pressure care products is further complemented with our Ring Cushions, V-Shaped Pillows and Neck Rolls. These products are used in many applications to provide comfort and relief from painful pressure sores, aches and pains. They are machine- or hand-washable and flame-retardant.

Devon™ Patient Positioners

Positioning patients properly in the Operating Room is critical to providing the best care possible and protecting against complications such as pressure ulcers and nerve damage. These preventable injuries can be devastating to the patient and have significant consequences. Selecting the appropriate positioning devices for each procedure is a collaborative process for the perioperative registered nurse, surgeon and anaesthesia provider. Designed to aid in proper positioning and pressure distribution, Devon Positioning Products provide a complete offering to help position and protect patients in the Operating Room. These latex-free single-patient-use positioners are made from fire retardant foam in a raspberry swirl colour and are supplied individually vacuum-packed or in convenient box quantities.

Medipal® 70% Alcohol Wipes

Medipal's Alcohol Wipes are made of Tritex non-woven and all contain 70% w/w isopropyl alcohol. They are the most rigorously tested, effective and proven efficacious alcohol wipe product on the market today.

- Effective against 99.999% of bacteria according to EN standard tests: BS EN 1276, BS EN 13704, BS EN 13727, BS EN 14348, BS EN 14476, BS EN 14561, 3-stage Siani protocol C.diff and MRSA test and BS EN 13697.
- Controlled dosage ensures disinfection every time.
- Tritex technology – strong, low linting – tougher and doesn't produce fibres.
- Medipal Alcohol Wipes are smear-free, leaving no visible residue on glass and stainless steel.

Medipal® Alcohol-Free Disinfection Wipes

Medipal Alcohol-Free Disinfection Wipes are made of Tritex non-woven and are proven to clean and disinfect in clinical environments. The wipes are the most rigorously tested, effective and proven efficacious disinfectant wipes product on the market today. Medipal Disinfectant Wipes function as both a detergent and disinfectant and are effective on their own or in combination with other products from the Medipal range. Medipal's biocides are uniquely blended to prevent bacterial resistance and superbug formation. Medipal Disinfectant Wipes are proven to kill most microorganisms such as bacteria, fungi, yeasts and viruses. The wipes have been independently tested to a wide range of EN standards.

Pretty Confidence

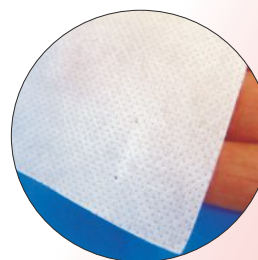

Non-Woven Bedding Protection

Zip

Tie Tapes

Tuck in Flap

Pretty Confidence is our softest range of bedding protection products, designed for everyday use where light protection is required.

A large range of fastenings is available and a number of standard sizes, although we are happy to consider making custom sizes too.

Our Pretty Confidence non-woven material is not only soft, comfortable and splashproof but is also vapour-permeable, allowing air to pass very slowly through microscopic holes too small for liquid, enabling sweat-free sleep.

- * Vapour Permeable

Reusable Machine-Washable Fabric Pants

ACTIV Female Mini

Mini Brief with built-in pad is particularly suitable for use during sports or exercise. Pad absorbs up to 120ml.

ACTIV Female Full

Full Brief with built-in pad features the fashionable Activ style but with a fuller design. Pad absorbs up to 120ml.

ACTIV Female Shortie

Shortie Pants with built-in pad are designed to look like normal underwear. Pad absorbs up to 150ml.

READI Female Full

Readi Brief with built-in pad features a stay dry layer to reduce dampness and maintain a fresher feeling. Pad absorbs up to 250ml.

READI Female Pouch

Readi Brief Pouch Pant has an internal pouch for a disposable absorbent pad (not supplied) which can be changed without removing the briefs. A large stay-dry liner reduces dampness to maintain comfort.

READI Male Traditional

Readi Traditional Brief with built-in pad is a full style brief with a traditional appearance, fly opening and a stay-dry layer to maintain a fresher feeling in everyday use. Pad absorbs up to 250ml.

READI Male Briefs

Readi Brief with built-in pad has a more contemporary appearance and includes a stay-dry layer. Pad absorbs 250ml of fluid.

READI Male Pouch

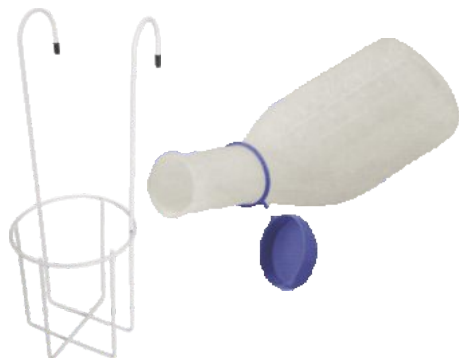

Readi Brief Pouch has a stay-dry layer plus a waterproof outer layer, an internal pouch for a disposable absorbent pad (not supplied) which can be changed without removing the briefs.

Bedpans & Urinals

495PP - A male urinal with a cap for easy transportation. This product has graduated external marking to its 1000ml capacity and is manufactured from natural-coloured polythene. It can be cleaned in a washer/disinfector where temperatures do not exceed 90°C. 495PP can be used with our non-spill adaptor (**NSA1**), a unique product that incorporates a silicon teat one-way valve designed to help improve patient confidence and prevent spillage in use. Wire holders (**UMH20**) which easily attach to the side of the bed can also be supplied for this product.

BP3 - A "perfection" style bedpan. Designed for general use, includes a handle for easy transportation. This product is manufactured from autoclavable blue polypropylene.

UF2 - A slipper-shaped female urinal designed with a flat front for easy positioning, particularly where patients are immobile. This product is manufactured from autoclavable green polypropylene.

UF1000 - A female urinal suitable for sample collection, as it includes graduations for easy measurement. This product is manufactured from natural-coloured polythene. It can be cleaned in a washer/disinfector where temperatures do not exceed 90°C.

SP1 - St Peters Boat is a urinal suitable for sample collection, as it includes internal graduations for easy measurement. Made from autoclavable blue polypropylene.

UFSS1 - A slipper-shaped female bedpan with spout and stopper, which allows easier sample collection. This product is manufactured from natural-coloured polythene. It can be cleaned in a washer/disinfector where temperatures do not exceed 90°C.

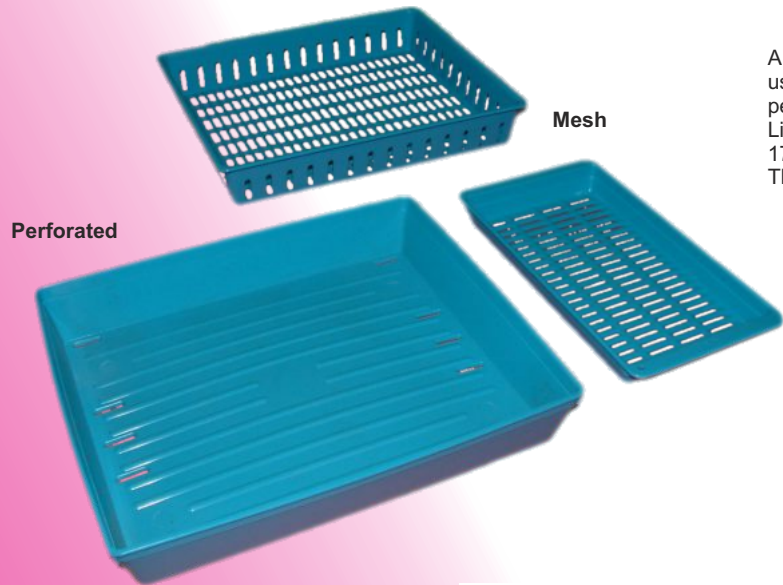

2400SA - Dover commode specimen collection unit is designed for the collection of urine and stool samples or kidney stones. It has a wide lip and clearly marked gradients. It holds approx 26oz (766ml).

Silicone Mats for DIN Trays

Silicone Mats are designed to fit metal DIN trays typically used in cleaning systems. They have a minimum temperature resistance of -60°C and a maximum of 250°C. The vents increase water immersion and promote rapid drainage. These products can be cleaned for a minimum of 1000 cycles in washer/disinfector machines compliant with ISO15883 and steam-sterilized in autoclaves compliant with HTM2010, HTM2030, BS3970 and ISO17665. 3 sizes are available, all in pink.

Cat No		Pack	Price
MAT230150	SILICONE MAT FOR SMALL METAL DIN TRAY 230 x 150mm	Each	12.35
MAT250240	SILICONE MAT FOR MEDIUM METAL DIN TRAY 250 x 240mm	Each	27.25
MAT480250	SILICONE MAT FOR LARGE METAL DIN TRAY 480 x 250mm	Each	55.25

Polypropylene Instrument Trays

Reusable Polypropylene Instrument Trays

Screw-Cap Containers

We boast a massive range of screw cap containers. These can be purchased complete with lids which can be supplied with or without wadding. We also supply the lids and containers separately. Wadding helps to improve the seal, thus increasing user confidence. Wadding is typically made from steran card but expanded polythene is also used for some of our range. Our range includes tamper-evident containers - once the lid is applied a simple seal must be broken before the lid can be removed. All our screw cap containers are manufactured from FDA approved polypropylene. You may also wish to take advantage of our mini packs, which allow for smaller purchases or better balance of jars and lids.

Screw Cap Range

Manufactured from a durable polypropylene and available in three colours, these containers are suitable for most pharmaceutical applications. Supplied complete with lids.

Clear Plastic Boxes

Manufactured from 1mm clear polystyrene and available in various shapes and sizes, with internal partitions for most types. Tight-fitting push-over lids allow solid stacking without slippage. The clear design makes these containers ideal for storage/presentation and/or displaying contents. Partition details are available on request.

Medicine Measures

Four types of medicine measure are available. The disposable UMP range is available in five colours, all 30ml capacity with 1ml minor graduations and 5ml major graduations. UMP measures are supplied 80 to a polythene sleeve, 60 sleeves per carton. A dispenser and lids are available for the UMP range. The MED60D is graduated every 5ml up to 25ml and every 10ml thereafter to its 60ml capacity and is supplied in boxes of 1000. The 440PPM, an autoclavable measure with 5ml graduations to 30ml and 10ml graduations from 30ml to its 60ml capacity, is supplied in boxes of 25. 460TPX is a tougher TPX plastic clear measure which is easy to see through and autoclavable. It is supplied in boxes of 100. 460TPX is graduated every 10ml up to its 60ml capacity.

Our UMP1 medicine measure is available in a choice of colours.

Specimen & Biohazard Bags

We stock a wide range of biohazard and specimen bags. Specimen bags are manufactured from a high grade 200g polythene. The specimens are isolated in the resealable section of the bag. Side welded to each of our specimen bags is a document pocket which typically is used to hold a report card.

Biohazard bags are much the same as specimen bags but include a biohazard warning on the resealable section of the bag which clearly identifies the contents as hazardous. Biohazard bags also incorporate a document pocket.

Cat No		Pack	Price	20+
HB50	SPECIMEN 5x5.5" (127x140mm), POCKET 5x8" (127x203mm)	1000	18.75	18.05

As part of the Department of Health's drive to minimise drug administration errors in critical care areas, the Councils of the Royal College of Anaesthetists, the Association of Anaesthetists of Great Britain and Ireland, the Faculty of Accident and Emergency Medicine and the Intensive Care Society agreed to recommend the adoption of a single standard for syringe labelling.

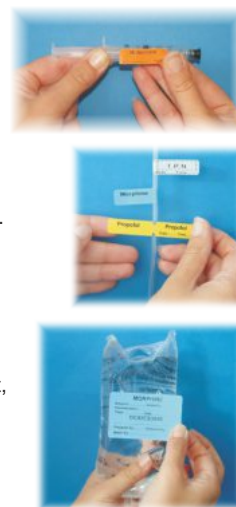

The Hospicode® Medilabel Colour-Coded Syringe Labelling System is totally compliant with the above recommendations. Groups of drugs are easily identified by colour and the Hospicode® Medilabel System is also supplied in colour-coded boxes for even easier, safer and more convenient use.

In addition to syringe labels Henleys are also able to supply longer labels (ideal for I.V. lines) and larger labels (ideal for I.V. bags or syringe drivers).

Line Labels are designed to allow intravenous lines to be easily recognised. The left side of the label is the same as the Hospicode® syringe label showing drug name. The right side of the label also shows the drug name but has space for date and time, so every aspect of administration is accounted for.

Drug Additive Labels are a larger label designed for I.V. bags. These show the drug name and also allow space for amount, added to, concentration, time, date, patient's name, prepared by, batch no and checked by.

We stock over 500 drug titles, each supplied in a convenient colour-coded dispensing box. Also available are transparent wall holders and stand-alone containers.

Cat No		Pack	Price
SLS???	ALL MEDILABEL SYRINGE LABELS 1½" x ½"	400	4.24
LL???	ALL MEDILABEL LINE LABELS 3" x ½"	200	4.30
DAL???	ALL MEDILABEL DRUG ADDITIVE LABELS 3" x 2"	200	4.00
SLSWALL	WALL RACK HOLDS 11 ROLLS	Each	19.00
SLSTRAY1	CLEAR PERSPEX SYRINGE AND/OR LINE LABEL HOLDER, HOLDS 10 ROLLS	Each	11.20
SLSTRAY2	CLEAR PERSPEX SYRINGE AND/OR LINE LABEL HOLDER, HOLDS 20 ROLLS	Each	18.45
SSDL??	STERILE STRIPS OF UPTO 18 VARIOUS SLS LABELS	250	325.00

We can also supply syringe labels in sterile form - strips containing up to 18 Medilabels of your choice. Please call our Customer Care Team on 01707 385226 to discuss your requirements.

An order form with a complete list of Medilabels is available on request.

Self-Adhesive Labels

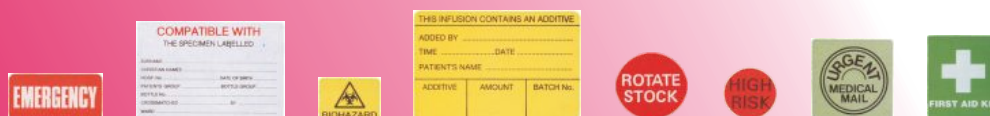

Top quality self-adhesive labels produced to your own specifications and design, using the 'Hot-Foil' printing process. This produces labels with great impact, consistently high colour density, high definition and excellent fade resistance. For those difficult applications, the labels can be laminated with a clear high gloss polyester film. This renders the label waterproof, scuff resistant, easy to clean and virtually indestructible. We can also produce multicolour labels, metallic labels and round labels. Most sizes of our labels are supplied rolled into convenient dispensing boxes. Please call our Customer Care Team on 01707 385226 to discuss your requirement.

Permanent Adhesive Colour Labels are available in black, white, light blue, dark blue, orange, light green, dark green, pink, buff, brown, fluorescent tangerine, red and yellow.

Peelable Labels are normally only available in white. Please call our Customer Care Team on 01707 385226 for details of other colour options.

Text colours available are, black, white, light blue, dark blue, light green, dark green, light brown, dark brown, pink, orange, yellow, grey, purple, maroon and buff.

Metallic Labels are produce a wide range of metallic labels. Please call our Customer Care Team on 01707 385226 to discuss your requirements.

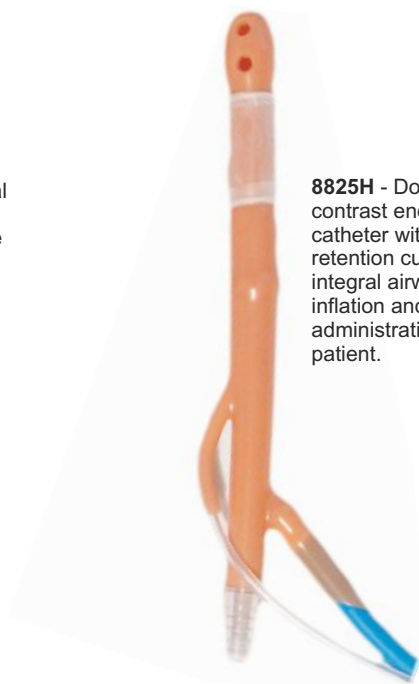

Barium Enema Products

The Henley traditional style barium enema catheters and air insufflators are designed for either single or double contrast studies. All items are entirely latex-free, with cuffs on the retention catheters being produced from silicone to avoid any potential latex allergy risk.

9507H - Double contrast enema catheter with integral airway for air administration to the patient, but without retention cuff.

8825H - Double contrast enema catheter with silicone retention cuff and integral airways for cuff inflation and air administration to the patient.

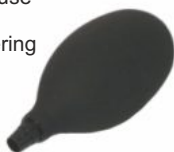

9509H - Double contrast enema catheter with extra large olive and integral airway for air administration to the patient, but without retention cuff.

9529H - Pre-measured insufflator for retention cuff inflation to the correct size.

9525H - Insufflator for use with double contrast catheters for administering air to the patient.

920H - Empty enema bag, 3 litre capacity with secure closure plug and 1.7m length of wide bore tubing with flow control clamp.

820H - Plastic inflatable barium enema spillage ring.

TENS Units

Maxtens units feature a wide array of output combinations to help get the setting “just right”. With timers ranging from 15 to 30 (MAX1000) or 15 to 90 (MAX2000), and continuous mode, users can choose the settings that are right for them. They also feature three modes: B(Burst), N(Normal) and M(Modulation). The pulse rate, pulse width and amplitude are also fully adjustable.

These TENS units are supplied complete with a convenient hard plastic carry case, housing the unit itself as well as all its accessories including battery, leadwires, electrodes and instructions.

MAXTENS1000 and MAXTENS2000 are covered by a full 12-month warranty.

Cat No		Pack	Price

TENS Self Adhesive Pre-Wired Pigtail Electrodes

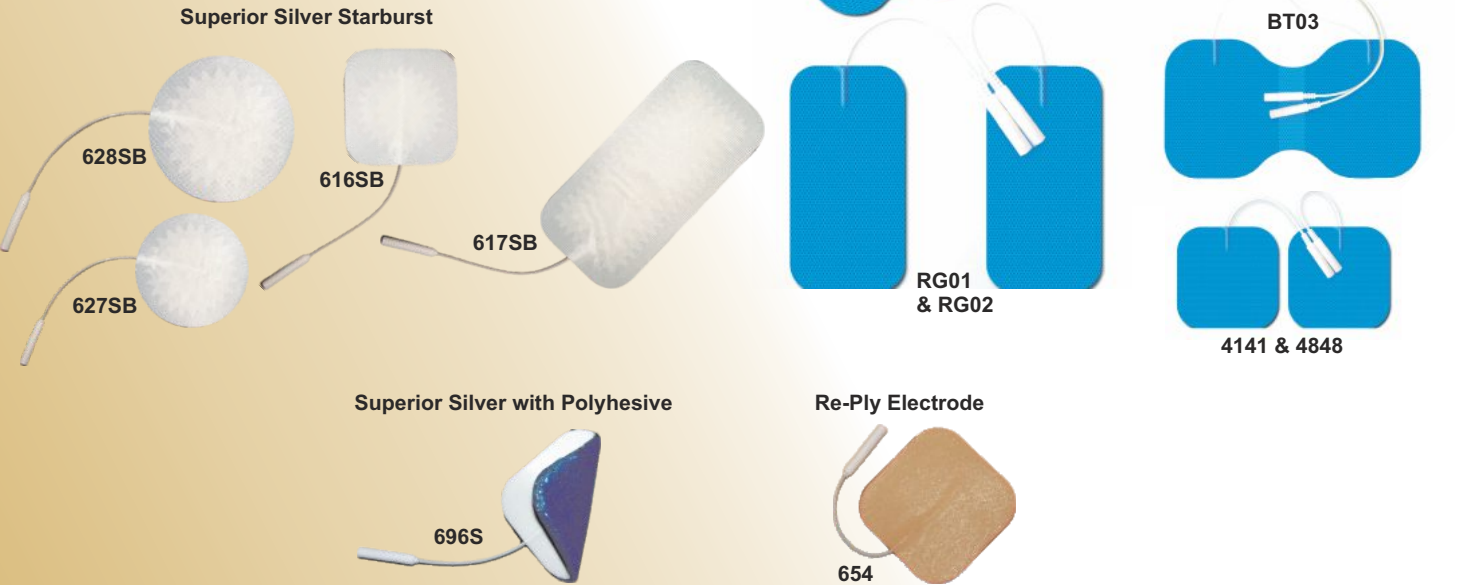

PROTEN are cost-effective TENS electrodes with excellent adhesion qualities and a soft cloth construction.

Superior Silver® Starburst electrodes incorporate a patented multi-layer gradient pattern for the most advanced current distribution available and a thick hypoallergenic hydrogel formulated with pure aloe vera, known for its hydrating properties.

Superior Silver®, with extra-thick blue POLYHESIVE™, is a good choice for patients with sensitive skin. The conductive silver layer provides uniform current distribution and reusability. They have a soft foam construction.

Re-Ply® electrodes are a cost-effective solution without silver. They have a tricot construction.

Instrument Marking Tape

Uniquely pliable Time Instromark Tape is self-adhesive and produced in eight colours to mark instruments for fast accurate sorting or to identify ownership at a glance.

The plastic tape is 3/8" (9.5mm) wide, has a self-adhesive backing and moulds easily to any surface - rounded, angular or plain. A light touch of the fingertip secures the tape in position for months. It is not affected by scrubbing solutions and does not dry out or become brittle, even after repeated autoclaving. Its lightweight design means it will not affect the weight of the products or create obstruction during use. Roll lengths are approx 200" (508cm).

Tubing Connectors

We have a wide range of tubing connectors available, including straight, reducing, "T", and "Y" connectors, as well as our universal "Y" connector. We can supply them in three alternative packs: sterile, which are individually packed in peel pouches, standard packs in a convenient clear plastic box and bulk packs in polythene bags. All connectors are supplied barbed for maximum tubing grip unless otherwise stated.

Baby Boards - I.V. Supports

A soft foam cushion on an aluminium base provides maximum immobilisation of the limb while securing I.V. lines. The support can be adjusted to fit around the elbow, leg or heel. Our Baby Boards are supplied complete with fixing tape which is specifically designed to securely hold the board in place.

Cat No		Pack	Price
6201	BABY BOARD PREMATURE 3"	50	57.00
6202	BABY BOARD NEONATAL/SMALL SIZE 4"	50	53.00
6203	BABY BOARD INFANT/LARGE SIZE 5"	50	53.00

Baby Shades - Phototherapy Eye Protectors

The hydrogel adhesive provides excellent adhesion without irritating delicate skin and allows easy removal and re-application. Included in the pack is the "keeper strap" which, if required, can be used to stop the shades from moving on active infants.

The shades are manufactured from a very soft foam fabric which provides a comfortable fit.

Cat No		Pack	Price	5+

- Single, double and triple lumen catheters
- Polyurethane formulation
- Clear, lipid-resistant Luer Lock hubs
- Completely encapsulated X-ray opaque lines
- Numerical depth markings every 1cm
- Smooth, rounded atraumatic tip
- Colour-coded I.V. extensions on double and triple lumen catheters
- Sterile, multiple sizes and lengths
- Latex- and DEHP-free

ARGYLE™ DeLee Mucus Specimen Traps

Mucus traps are available for oral only, mechanical only or oral/mechanical suctioning. The DeLee Mucus Traps with vacuum breaker and filter come complete with catheter and hydrophobic filter and are ready to use.

ARGYLE™ DeLee Mucus trap

- Individually sterile-packed
- Three sizes, 6.5, 8 and 10 French Gauge
- Transparent 20cc graduated mucus traps with removable cap for easy measurement of specimen
- Whistle tip catheter with SLIDE-TEX™ finish allows efficient suction with ease of insertion and withdrawal
- Latex-free

ARGYLE™ DeLee Mucus trap with vacuum breaker and filter

- Individually sterile-packed
- Three sizes, 6.5, 8 and 10 French Gauge
- Transparent 20cc graduated mucus traps with removable cap for easy measurement of specimen
- Oral/mechanical or oral only options
- Extra trap cap to reduce spillage during transport
- Whistle tip catheter with SLIDE-TEX™ finish allows efficient suction with ease of insertion and withdrawal
- Advanced hydrophobic filter shuts down when it comes into contact with fluid, protecting the clinician against contact with the specimen

ARGYLE™ Specimen Trap

- Individually sterile-packed
- Transparent 40cc graduated trap with removable cap for easy measurement of specimen
- Second screw-on cap to reduce spillage during transport
- Latex-free

Blood Lancets

Surgilance™ Safety Lancets make blood sampling easier for the clinician and more comfortable for the patient. The lancets do not require arming and are available in depths from 1.0mm to 2.3mm, with each depth uniquely colour-coded and suitable for different applications. A high speed delivery and penetration method minimises patient pain and clinical error and, once the lancet has been used, it is rendered inoperable for maximum safety.

Cat No	Type	Colour	Depth	Gauge*	Blood Flow	Pack	Price	10+
SLN100	NEEDLE	YELLOW	1.0mm	G26	LOW 5-10µl	100	22.00	21.00

SLB250	BLADE	BLUE	2.3mm	G18	HIGH 150-200µl	100	23.00	22.00

* = Standard Wire Gauge, at point of penetration.

Medipoint Steel Blood Lancets are made from high quality stainless steel and will not bend in use. The ridges along the length strengthen the lancet and provide a confident grip without the risk of slipping. The extra thick steel point has a triple-bevelled edge which tapers to a point from all sides, meaning it is far less painful for the patient. Stainless Steel Blood Lancets are supplied in packs of 200, individually sterile-packed.

Cat No	Pack	Price	50+	100+
BL2 MEDIPPOINT BLOOD LANCET	200	3.80	3.60	3.50

Lemon & Glycerine Swabs

Lemon and Glycerine Swabs rely on the tangy citrus flavour of lemon to stimulate the patient's taste buds and excite the salivary glands. Glycerine further stimulates the production of saliva. Our swabs are particularly suitable for patients on oxygen or fluid restrictions, comatose patients on IV's and terminally ill patients. They are suitable for routine oral care with elderly patients in hospices or at home. Supplied in packs of 3.

Cat No		Pack	Price	10+	50+
LGS25	HENLEY LEMON & GLYCERINE SWABS	25x3	5.99	5.35	4.95

Catheter Spigots

Supplied in boxes of 100, individually packed sterile and available in two sizes. Suitable for all standard catheters and tubes. The tapered design gives a positive fit. The head of the spigot is flanged to provide maximum grip and to assist withdrawal of the spigot from the catheter. **Small** size, 50 x 10mm diameter at top end, fits 3 - 8mm. **Large** size, 50 x 13mm diameter at top end, fits 4 - 12mm.

ORDERING INFORMATION

Please provide the following information when ordering:

- * Your Name, * Telephone Number, * Account Number (if known), * Delivery and Invoice Addresses, * Order Number,
- * Catalogue Numbers with Descriptions and Quantities required. Confirmation orders must be marked clearly to avoid duplication.

STANDARD CONDITIONS OF SALE

Product Descriptions	Product descriptions are subject to alteration without notice and are not binding. Specifications are only intended to represent the type of goods offered. Design improvements may not be detailed within the description.
Prices	Prices are subject to VAT and alteration without prior notice. We reserve the right to invoice goods at ruling prices on the date the order is received. Prices shown in our catalogue are correct at date of print.
Quotations	All offers, written or verbal, are valid for 30 days, unless otherwise specified. The right is reserved to amend any accidental errors.
Minimum Order Value	Our minimum order value requirement per order is £15.00 (excluding VAT).
Delivery and Handling	<u>UK Mainland</u> (including IOW) - A handling/delivery charge at the rate applicable on the date of despatch (currently £8.45) will apply to any consignment below our specified goods value (currently £200 excluding VAT). Above this value no charge, unless an upgraded delivery service is required. <u>Off UK Mainland</u> - A handling/delivery charge at the rate applicable on the date of despatch (currently £18.00) will apply to any consignment below a goods value of £300 (excluding VAT). Above that value no charge, unless an upgraded delivery service is required.
Delivery of Goods	Delivery is normally within 5 working days following receipt of order, subject to stock availability. Upon request an upgraded service is available for a next working day delivery at extra cost, which will be advised prior to despatch.
Damaged Delivered Goods	Claims must be made verbally within 2 working days from delivery and confirmed in writing. If evident upon delivery of the consignment, the Carrier's delivery document should be endorsed accordingly. Goods and packaging should be retained for inspection.
All Other Claims	Claims should be made verbally within 21 days of despatch, and confirmed in writing.
Payment of Accounts	<ul style="list-style-type: none"> - Credit available on application subject to approval. - Please note, we understand and will exercise our statutory right to claim interest (currently 8% over BOE base rate per annum) and compensation for administrative costs under the late payment legislation, as amended 7th August 2002, if we are not paid according to our credit terms.

Please note that the above Standard Conditions of Sale **do not apply to orders placed via our website**. If you wish to order on-line, please refer to our Terms of Sale shown at www.henleysmed.com.

Overseas Orders (including Channel Islands) - We are able to deliver overseas but charges & delivery times differ according to weight & destination. Please telephone our Export Department on 01707 385223 or e-mail customercare@henleysmed.com for a quotation.

POLICY ON RETURNED AND REPLACEMENT GOODS

RETURNED GOODS - Goods are accepted back for credit at the discretion of our Purchasing Manager, but generally the following policy applies.

- Requests for the return of goods must be made within 21 days of supply.
- Items will not normally be accepted back for credit if:-
 - The product is not a stock line, (i.e. purchased specifically to fulfil an order), quantities involving a special production run or customised items. If the order requirements fall into any of these categories we may request signed acknowledgement before the order is processed.
- Items will be accepted back for credit if:-
 - Goods have been supplied in error by Henleys Medical Supplies Limited or faulty, irrespective of value.
 - Goods have been ordered in error by the Customer, providing the items are stock lines, are returned in a saleable condition and not exceeding a total value of £500.00.

It is often the case that manufacturers apply additional costs or refuse to issue credit for returned goods. Regrettably, therefore, if goods have been ordered in error by the Customer, a handling charge (minimum 10%) may be deducted from the value of returned goods.

Goods should be returned to the address shown at the foot of this page together with a copy of the original Delivery Advice Note. If required, we will arrange collection but this service will be charged at cost if due to Customer error.

REPLACEMENT GOODS - We do not offer direct exchanges. Replacements are despatched immediately, subject to stock availability, and invoiced. A separate Credit Note is issued in due course for returned goods.
