Dear Eng. Razan Asad

Please find a few options below:

Handi+ - pn.0111250 = USD \$170

This is a very easy to use basic device, but you can not change the sensor. Once the sensor expires, the device needs replacing. Lifespan is typically 2+ years.

MaxO2+A - pn.0111260 = USD \$328

Easy to use, simple device, has a replaceable sensor.

Ultramax = pn.0111265 = USD \$534.50

This device is specifically for O2 concentrators. It measures O2 using an ultrasonic sensor that does not require replacement. It also measures flow and the pressure.

Please let me know if you have any questions.

Best regards

Ryan

Dear Eng. Razan Asad

I can confirm we have a number of analysers that would be suitable for testing O2 concentrators.

Do you have any particular specifications we can look at or should I make some suggestions for you?

I look forward to hearing from you.

Best regards

Ryan
