Hello Janine,

I hope you are doing well, it was long time since we heard from each other

Kindly revise the attached offer to include Qty.5 oxygen analyzer with exact supply parts.

Note: we will arrange for the shipment transfer from our side, so please remove it from you scope

Hope to hear from you shortly

Best regards

Eng. Khalid N. Al Ezi

Hello Khalid,

Please find the signed proforma attached.

My colleague has advised me the item will be available mid March.

Once we have received payment I can reserve two on the system for you, so as soon as they are available they will be dispatched.

I have also attached the instruction manual.

Kind regards

Janine Gill

Subject: Re: Portable oxygen analyzer

Hello Khalid,

Regarding COO, one from UK with your company name on it is more than enough, so please add it to the invoice & send it to me - **Please see attached.**

Please be patient with me, as it is new item for us and we need to check every thing at least for this time

Does the analyzer come with calibration certificate? If yes what is the validity for it?, if no can we get it ? **They do not come with a certificate as the equipment are user calibrated each time they are used.**

Please check the proforma and let me know if all is correct or if anything needs changing. We can sign and stamp it if you are happy to proceed.

Kind regards

Subject: Re: Portable oxygen analyzer

Hello Khalid,

Regarding your attached offer, does it include the certificate of origin? If not please include it - It does not include the certificate of origin if you just need a UK one that would cost \$80 if you need one for a different country we would have to get a price for you, I do know it will be more than \$80.

If included then your offer is approved, please send to me signed and stamped invoice to proceed with payment. Once we have the proforma correct and all items on we can sign and stamp it for you.

One last thing, during next week payment will be done, assuming so what is lead time for the delivery. I am just waiting for my colleague to get back to me with a lead time. As soon as I know I will let you know.

Note: this order done in order to test the analyzer, once approved by our customers we will purchase several batches.

Kind regards

Sorry for my poor language,

Of course it will measure oxygen gas which comes for evaporated liquid oxygen, I meant the source is liquid oxygen which is known for high purity 99.5% as most of analyzers measures up to 96% which is not enough to evaluate liquid source (in gas phase). 😊😊

I hope it is clear now

In case you have any question please inform me

Hope to hear from you shortly

On Thu, 2 Feb 2023 at 10:30, Khalid N. Alezi <khalid.natiq@alnafath.com> wrote:

Dear Janine,

Thanks for prompt reply, the application is for spot readings

The best solution for us is (**MaxO2+AE**) Oxygen analyser (preferably with R-17MED sensor) noting that it should cover 100% reading range so it can be used with liquid oxygen source, other wise you are free to chose the best selection as long as it will be suitable for medical use

Regarding spare sensor, of course you are right but at least inform the price so we can estimate cost of future replcement.

Hope to hear from you shortly

Best regards

To: khalid.natiq@alnafath.com
Subject: Re: Portable oxygen analyzer

Good Morning,

Please find the info below as requested.

Do you require a unit for continual monitoring or for taking spot readings?

We can offer:

0111275 Oxygen analyser OxiQuant S. Internal sensor can be replaced when exhausted. For non-medical applications.

0111250 Handi+ Oxygen analyser with integral sensor. Once the sensor has been exhausted the whole unit can be disposed of. For medical and non medical applications.

0111260 MaxO2+A Oxygen analyser. Internal sensor can be replaced when exhausted. For medical and non medical applications.

For a unit with the sensor on an extension lead then we can offer.

0111261 MaxO2+A Oxygen analyser. External sensor can be replaced when exhausted. For medical and non medical applications.

The above are just analyzers, we can also offer oxygen monitors that have alarms.

We would not usually advocate buying spare sensors now as the ones in the units will typically last say 1 -3 years.

Kind regards

Janine Gill

Hi Janine

They do not mention a sensor cable, so it looks like their requirement is for direct connection to the analyzer. Going by their company name they could well need for industrial rather than medical applications.

I would ask them if they require a unit for continual monitoring or for taking spot readings.

We can offer:

0111275 Oxygen analyser OxiQuant S. Internal sensor can be replaced when exhausted. For non-medical applications.

0111250 Handi+ Oxygen analyser with integral sensor. Once the sensor has been exhausted the whole unit can be disposed of. For medical and non medical applications.

0111260 MaxO2+A Oxygen analyser. Internal sensor can be replaced when exhausted.
For medical and non medical applications.

For a unit with the sensor on an extension lead then we can offer.

0111261 MaxO2+A Oxygen analyser. External sensor can be replaced when exhausted.
For medical and non medical applications.

The above are just analyzers, we can also offer oxygen monitors that have alarms.

I would not usually advocate them buying spare sensors now as the ones in the units will typically last say 1 -3 years.

Regards

Steve
