A pdf or (hard copy proof if required) will be sent to you for approval.

GMG Proofs are hard copy, colour correct proofs simulating a wide variety of material substrates. The proof accurately shows trapping and overprints – inks printed on top of each other, to accurately simulate a printed result. Proofs can be printed on clear, silver or white substrate to enable you to check white layers are correct and see how the colour of the product will affect the design and branding.

Utilising the GMG proof workflow at OPM, we can manage colour expectation and ensure corrections can be made prior to print, minimising cost and effort.

Please confirm your proof requirements to the team.

Confirmation of approval of your proof must be emailed to **repro@opmgroup.co.uk**

Should amendments be required, a further proof will be submitted for your approval.

Please note that any amendments/alterations other than those necessitated by reason of our errors or omissions will be charged as extras.
