Hi Bryan,

Thanks for the clear and extensive answer.

I'd like to buy the mentioned R-33 cell, and have it delivered with UPS Express (just to buy some peace of mind :-). My mate isn't sure if he will be home when it gets delivered, so please have it delivered to the UPS delivery point below:

Effe Anders
Vlietskant 18
4141 CL Leerdam
The Netherlands

But care of:
Arjan de Ruiter
Diefdijk 26
4145 MJ Schoonrewoerd
The Netherlands

As to your other question: Yep, I'm still in the business of reselling dive equipment. I'm an Inspiration CCR instructor, and in fact was responsible for setting up the European distribution center for AP Diving in The Netherlands (Martin is a good friend of me).

If you send me a PayPal or ApplePay link, I'll pay it straight away.

Thanks in advance for the good service,

Tino de Rijk

Van Boeijenplantsoen 26
2253 WS Voorschoten
T: +31654984158
E: tino@r2t2.nl or tino.de.rijk@hotmail.com

Hi Tino

I have looked in to the UPS carriage services and costs, please find the options below:

Based on shipping the sensor Monday
UPS Standard service = GBP £14 - should arrive by the end of day on Wednesday
UPS Express Saver = GBP £21 - should arrive by the end of the day on Tuesday
UPS Express = GBP £22 - should arrive on Tuesday morning

There would need to be someone at the address to receive the parcel and there would likely be a charge for your local VAT which would be payable upon receipt, if it is not paid the parcel would go back to the UPS warehouse.

There is always a risk that the parcel could get caught in customs as part of a random inspection, in our experience the express and express saver options do not suffer from this as much as the standard service.

I no longer have your company listed as a trade client, we switched to a new system in April 2020, so I assume you have not purchased since then. Is your company still active, do you resell equipment or have a dive centre?

I will await your reply.

Best regards
Ryan

Subject: Order for R-33S1 cell for Mixcheck analyzer
To: <sales@vandagraph.co.uk>

Dear Brian,

We just spoke on the phone, about an urgent delivery of a new O2 cell for an older MixCheck Trimix analyzer. You told me it is in stock & can be fast-delivered to Holland, which is very much appreciated. I might even still have a trade account with you...? (R2T2 Technical Diving in voorschoten, the Netherlands, name of Tino de Rijk). If not, or not anymore: not a problem :-).

The cell in question must be sent to:

Arjan de Ruiter
Diefdijk 26
4145 MJ Schoonrewoerd
Netherlands

Can you please tell me what it would cost to have it fast-delivered to us?
I need it no later than next Thursday, July 11.

I can pay you by PayPal.

Many thanks in advance,

Tino de Rijk.
