Hi Steve - we have a customer who would like us to amend the HS code of the UFO 130-2 so they don't need an import permit - RS said he didn't see a problem but to run it past you - would this be okay? Thanks

Steve, 09:42 Commodity 9019 2090 00 Optical, photographs, convextoprophic, measuring, checking, precision, medical or surgical instruments and apparatus, coloid, and workers, making precision, medical or surgical instruments and apparatus, coloid, and workers, making property, measuring, and accomposes thereoff ** Options, photographic, commonly spectrum, shortway proteins, medical or surgical instruments and apparatus parts and accomposes thereoff ** Proteins thereoff purposes accomposes thereoff ** Proteins thereoff thereoff purposes thereoff thereoff purposes or other thereoff the purposes thereoff t

Normally I would say no, as medical goods are zero rated. However, it could be argued that the code quoted is OK and appropriate. It would be interesting to find out why they do not need a permit for the new code. See attached to back up the reason for the temporary change. Let me know if you want me to discuss with Cathy.

09:52

Thank you - it's still a Proforma at the moment, so I will add a note for when they pay for Cathy - if any problems I'll let you know
