

DB30

100mA · UA 78L fixed voltage regulators · positive

Fairchild

Top view

The UA 78L series of three terminal positive voltage regulators offer three voltage levels: +5V, +12V and +15V with a maximum output current of 100mA, subject to adequate heat sinking. This range offers thermal overload protection, short circuit current limiting.

Operating Temperature: 0°C to +125°C

TO92 plastic case

VOLTAGE	UNIT QTY	ORDER CODE
+5V	4	253-25219C
+12V	4	253-25220D
+15V	4	253-25221A
