Hi Michael

Apologies for the delay in getting back to you.

Unfortunately we found a problem in the last QA stages of production. This has been identified, but has meant that we have to produce the sensors again. So, unfortunately there will be another two weeks delay.

All I can do is apologize and provide assurances that once approved, any subsequent production batches will take the normal 4-6 weeks delivery schedule.

Kind regards

Steve

Hi Steve

Any news when the sensors will be ready.

We have got the first orders and will like to make our own test before we send them on the market. :)

Kind regards
