capnography

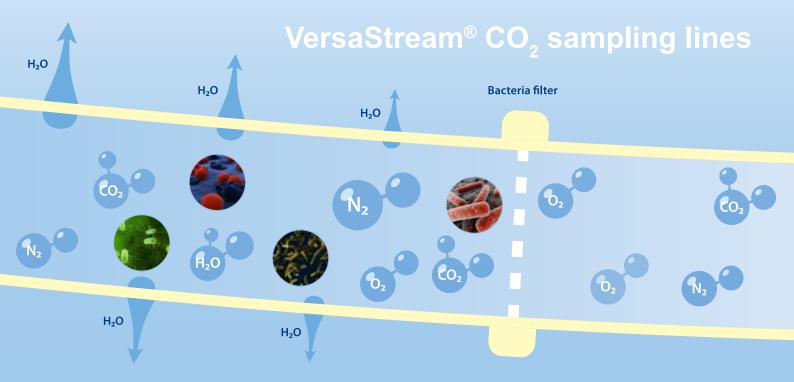

VersaStream®

VM-2500 Series CO₂ Sampling Lines

Innovative Solutions for Sidestream CO₂ Monitoring for use with Viamed VM-2500 series Capnographs

The VersaStream® gas sampling lines combine reliability, flexibility and cost efficiencies

Why VersaStream[®] CO₂ sampling lines?

- Cost-effective alternative to Nafion® tubes
- Kink Free
- PFAS Free
- The gas-selective non-porous material facilitates fast and complete removal of condensation from the sampling line
- The integrated bacterial filter prevents contamination
- Reliable measured gas values, due to negligible dead space volume of the filter - even in cases of high respiration rates
- For use with VM-2500 series Capnographs
- Integrated bacteria filter and water removal reduces the number of patient circuit parts and speeds up patient monitoring preparation time

Innovative material technologies

Latest material technologies permit active and complete removal of moisture and water – even in cases of low temperatures and high humidity.

No need to use expensive Nafion® tubes, which are not resistant to bending.

VersaStream[®] CO₂ sampling lines are very flexible and are suitable for short-term and long-term applications.

Available CO₂ sampling lines

Nasal Sampling Line

Nasal Cannula

Nasal/Oral Cannula

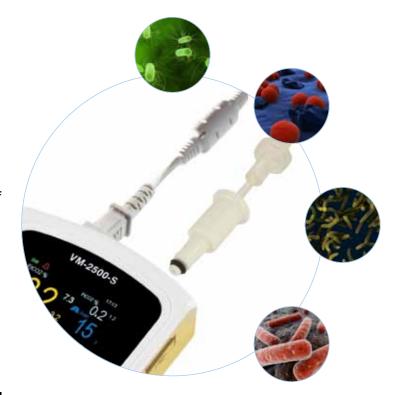

Airway Adapter Sampling Line

Luer Lock Male

Reduction of contamination risks

The integrated bacteria filter of the VersaStream® CO₂ sampling lines prevent contamination of gas-conducting components in and at the patient monitor. Transmission of germs, e.g. by contamination at the sample gas connection port of the monitor is prevented.

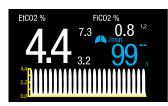

Reliable measured values – even in cases of high breathing or ventilation frequency

The dead space volume of the filter unit has been reduced to only a few micro litres, thus facilitating precise measurement of CO_2 concentrations in the breathing gas – even at high respiration rates.

Diverse areas of application

VersaStream® CO₂ sampling lines are suitable for use in areas, such as:

- Short and long term patient monitoring applications
- Monitoring of intubated and non-intubated patients
- Emergency medicine
- Patient transport
- Intensive-care medicine for adults and children
- Sedation
- Pain therapy, pain therapy management
 - Homecare
- Sleep clinics and CPAP-ventilation
