

neonatal, paediatric and adult products

Pulse Oximetry Sensor Wraps

- Helps to secure many styles of flexible pulse oximetry sensors without adhesive tapes
- Holds optical components firmly to help prevent misalignment
- Universal design may be trimmed to fit neonatal foot, infant toe or paediatric finger

The Posey 6554 pulse oximetry sensor wrap replaces adhesive tape to secure all models of flexible pulse oximetry sensors. The wrap holds the sensor firmly to prevent misalignment of optical components whilst blocking out excessive ambient light. The soft foam tape-less fastener does not stick to the skin, allowing for easy application and removal; this also helps to preserve delicate skin. Model ref. 6554 is a universal design and may be cut to length.

0021013 **Neonatal Foot, Infant Toe or Adult/Paediatric Finger** Model: 6554
140 mm (L) x 30 mm (W) x 5 mm (D) Box of 12

Other box sizes also available, contact Viamed for further information

Removable I.D. Bracelets

- Temporarily replaces permanent I.D. when permanent I.D. interferes with I.V. site
- Allows "I.D." to remain on patient at all times
- Easily moved from arm to leg without disrupting skin integrity
- No adhesive "tape burns" when removed
- Soft foam with hook and loop closure. No tape!
- I.D. bracelets can be handwritten or for use with self-adhesive printed labels

3810000 **Newborn:** 140 mm (L) x 30 mm (W), box of 12 Model: 4648
