Hi, please see the quote request below from Golden Jubilee Hospital. I am happy to send the quote if someone can raise it.
Thanks,
Steve H

Hi Steve,

This is very much appreciated. I have passed on to our clinical staff.

Can you please arrange an official quotation for 1 unit and 1 pack of - 2520112 - Eye Adapters (single use) @ £82.00+VAT / pack of 50

Kind regards

Beth MacGugan

Subject: TOF3D Neuromuscular Transmission Monitor

You don't often get email from steve.hardaker@viamed.co.uk. [Learn why this is important](#)

Hi Beth,

Further to our conversation today, please see below some information regarding the TOF 3D and the available accessories.

The TOF-3D Neuromuscular Transmission Monitor costs £1,400 each, plus £12 carriage, plus VAT. *This price is valid for January. On February 2nd the price increases to **£1,436.40 each**, plus £12 carriage, plus VAT.*

There are three different monitoring accessories available for the TOF 3D Neuromuscular Transmission Monitor to allow secure placement of the accelerometer for accurate twitch response monitoring:

- 2520111 - Thumb Adapters (single use) @ £45.00+VAT / pack of 50 (**increasing in price in Feb to £46.20**)
- 2520112 - Eye Adapters (single use) @ £82.00+VAT / pack of 50 (**increasing in price in Feb to £84.20**)
- 2520110 - Hand Adapter (reusable) @ £38.50+VAT / each (**increasing in price in Feb to £39.60**)

Note: for hand placement, you can choose either the reusable hand adapter or the disposable thumb adapters, they are not used together. I have attached an Instruction Manual for reference, which illustrates the placement positions.

I have attached leaflets for your information.

The device uses standard paediatric electrodes, which Viamed does not supply, but which are readily available through standard supply chain channels.

Instructions for use are supplied in accordance with the Medical Device Regulation, and the device is for use by suitably qualified personnel: specialists, anaesthetists and nurses with specialization in anaesthesia care.

In addition, we can supply training materials for use by the Hospital Clinical Educator, these include: PowerPoint training presentation and a Windows based simulator which provides full operation simulation of the device. We also offer support to Clinical Educators. However, **we currently do not include on-site training.**

Please let me know if you require any further information; or if you require an official quotation, please let me know how many devices and which accessories you would like me to include.

If you have any questions, please let me know, and in the meantime I look forward to hearing from you in due course.

Best regards,

Steve Hardaker

Good morning,

I am looking at possibly purchasing a **TOF 3D Neuromuscular Transmission Monitor (part number 2510091)** from yourselves however I was wondering if you could clarify that this unit is suitable for use on the face? It is specifically required to be used on patients faces in this instance and therefore want to be sure that this unit is suitable. If so could you also please attach a quote.

Kind regards
