

Microstim Knobs

Background

There are Three different Microstim output control knobs

Microstim MS1000 :- MS10038

This knob was manufactured by MRI. and is not commercially available.

It could be manufactured locally in small quantities.

It is in three parts. The knob: the small screw: and the black label.

NB The customer should be offered a part exchange Microstim BD MkIII

Microstim DB :- DB40

This is a standard Black knob 22mm available from RS components
Pt.No. 498-839

Microstim MkIII

The Microstim DB MkIII uses a grey knob manufactured by Viamed.
