

Good morning Steve, GE (UK) have asked for 1 x 2510005 Microstim DB3 Tester. As there is no stock, I am wondering if we still sell these? Thank you (memo doesn't say much, but just checking)

Steve, 10:33

Yes we do, there should be a production job. Have GE purchased a Microstim?

10 going into production soon

10:40

Thank you. I can't see that they have purchased the DB3, but they have recently bought leads/knobs
