Aqib Majeed,

1.We would like to order :

60pcs UFO 130-2

please issue the Invoice and tell the lead time.

2. as we ever discussed with Mr Ryan at early years ago, we would collect the defective sensors which are under arranty for replacement. till now,we have received 3pcs defective sensors(UFO 130-2) from users for past 2 years(2023-2024),

1pc happened in 2023,

2pcs happened in 2024

they were reploted as "the Oxygen reading is too low"

We replaced them for users immediately, and now the 3pcs defective sensors in my hand, please tell me if we should deliver them to you for analysis, and send us the new one, thanks.

Thanks & Best Regards
Hanson Lijing
