

EnviteC – founded in 1992 specialized in sensors for medical applications – has been a member of the Honeywell Group since 2006. The company's headquarter is in Wismar (Northern Germany). With almost 100 employees and its own in-house development and manufacturing, EnviteC is a pioneer among manufacturers of compatible pulse oximetry sensors.

Today, the company specializes in the research and development of non-invasive sensors for vital functions in intensive care and emergency medicine, as well as for use in high-quality monitoring systems. As an innovative OEM partner for well-known medical device manufacturers, EnviteC is able to offer advanced technologies at the highest standards through in-house production. The company also develops innovative products within the respiratory gas sensor technology for industry and safety engineering.

## Values

EnviteC's goal is to support our customers as a fair and reliable partner, using our innovative resources for your benefit. We strive to help our customers maintain a competitive lead in their markets through our expertise and outstanding products.
