Order Notes:

Spoken to Allan over the phone following my email to him advising the R-22MED is not suitable for Automotive use. He confirmed they are using the sensors in a Premier Diagnostics machine and read out R-22AVG. I told him the price for this over the phone and he was happy for us to cancel his shopify order and email him a Proforma directly to pay via BACS. I am using same address details as the Shopify order but will double check.
