Hi Ryan,

Due to price, we never started up with the BIS sensors. They simply where to expensive.

We ordered and have some stock, but have not tested them in the market.

End user price Medtronic sensor is around 106,- NOK ea. (8,80€ ea)

We have customer very interested trying. They do complain that the original Medtronic sensor that it does not stick.

Very interested to learn more about your sensor.

BR Lars

Hi Lars

I hope you're keeping well.

We spoke a while ago about BIS sensors – did you ever end up adding them to your portfolio?

The reason I ask is that we're looking to take on a model that we can export. At this stage, I'm keen to gather feedback from end users. Do you have any clients who might be interested in trying them out?

I look forward to hearing from you.

Best regards
Ryan
