

Notice of Product Discontinuation – LIMITED STOCK AVAILABLE

Viamed Microstim DB3 Supramaximal Nerve Stimulator

It is with regret that as of the 19th April 2019 we are unable to accept any further purchase orders for the above product, which we have been manufacturing since July 2006.

This product is being discontinued as it is no longer feasible to produce, the main factor is due to:

- **Requirements and associated costs of standards and certifications.**

As an organization we have always embraced implement of standards. Viamed initially employed British Standards BS5750, then in 1994 adopted ISO 9000, which covers quality management and quality assurance. Latterly we also implemented ISO 13485, the standard for medical devices quality management. In parallel there are also the standards associated with CE certification. All of the above fall under the scope of the European Medical Device Directive.

The rigour of standards has increased significantly and the costs of applying these to legacy products is not feasible due to increased costs, as well as restricted access to services, such as clinical trials and reviews.

On behalf of Viamed I would like to thank our customers for their valued custom over the years. Should you wish to purchase before the deadline is imposed upon us, then please contact us. Please be aware there is limited stock available.

Part Number	Description	Price	
		1-9	10+
2510000	Microstim DB3 – Supramaximal Nerve Stimulator	£215.00	£193.50
