Great news — your item has sold.

[Contact buyer](#)

Your buyer paid and now it's time to arrange a collection.

When your buyer arrives, you'll need to use the eBay app to document that the item was collected. This helps protect you just in the case an 'item not received' case is ever opened.

Just open the eBay app, navigate to the order details for this transaction, and click the 'scan to confirm collection' button. Then you can either:

- Scan the QR code the buyer received through email
- Or select the 'enter code' tab to manually input the 6-digit code the buyer received through email

When you scan or manually enter the code, the item will immediately be marked as delivered. Again, this can be done [in the order details in the eBay app](#).

Please note that unless subject to a hold, your funds will be available for payout within two working days of order confirmation. Check your [payment information](#) for updates.

Thanks for being part of the eBay community.
