Hi, Aqib 😊

Me, again ! Just as promised, below is the email detailing the specific issues happening with the O2 Sensors.

Many Thanks,

Kindest Regards,

Jorge

Subject: O2 sensor issues

Hi Jorge,

as per our conversation we have had issue with the O2 calibration sensors. We have had different machines have the same calibration issues. When EME came up last week for a machine for this issue they informed us that the O-ring on the sensor is loose and therefore when tightened in the machine this can cause the O-ring to slip and cause a leak. They also had to lubricate the sensor as it was 'dry'.

We have communicated with the airway team who are aware of these issues. Since we last spoke, 2 people told me they had issues in PAT theatres last week with the same O2 sensors, unfortunately they were not able to give me any more information.

As we do not have spare machines to replace the ones we have understandably this is a patient safety issue and we have had different practitioners with different machines have the same problem.

For now we have to have these on our shelves as w have no alternative and it has been communicated to everyone to report any issues going forward.

Many thanks for your help,

Niki
