Subject: Foetal heart simulator repair quote
To: technical@viamed.co.uk <technical@viamed.co.uk>

Good afternoon,

I've got a foetal heart simulator that is off centre. I don't believe the inner membrane has ever been replaced so not sure if it could be that? I'm also getting a lot of fluctuation at 60BPM on all of our dopplers but the rest of the values read perfectly, so is that something that can be repaired also? If so could we get a quote for repair please? It's a V1000 Foetal heart simulator with serial number : PRO3226A11.

Thanks in advance,

Jamie Knight, Clinical engineering technician
