SMTP Gmail Settings

Login to your Work Gmail account – NOT the main box

Click the Option Settings

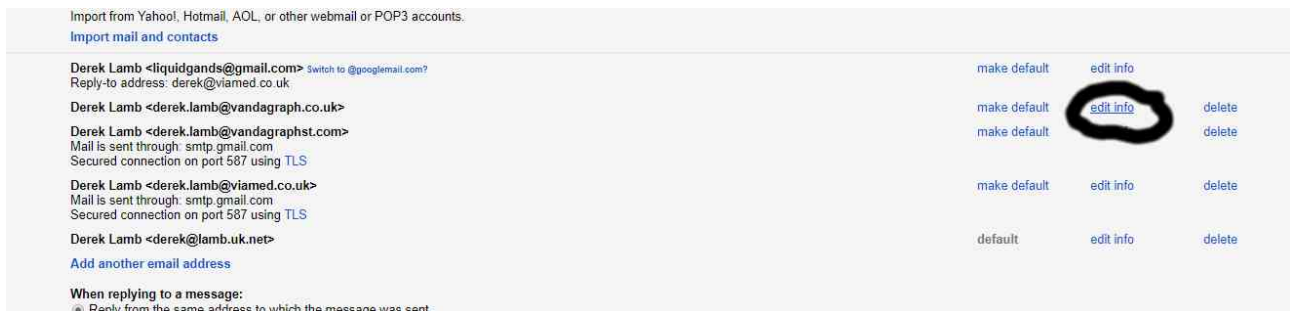

Click Accounts and Import

In the Send Mail as Section:

On the first NON gmail account click Edit Info

Leave the Next Page settings as is :

Click the Specify a different "Reply-to" Address

In the Box that opens up cut and paste the Email address setting into it, this should stop customer replys dropping in to the main box and go directly to your gmail account.

Click Next Step >>

Update SMTP Server smtp.gmail.com

Update Username viamedinbox@gmail.com

Update Password : crwyvhemisbdtyah

Leave other settings alone

The screenshot shows the 'Edit email address' page in a Google Chrome browser. The page title is 'Gmail - Edit email address - Google Chrome'. The address bar shows a secure connection to 'https://mail.google.com/mail/u/0/?ui=2&ik=478d768424&jsver=-CePnFTesrE.e...'. The main heading is 'Edit email address'. Below it, a section titled 'Send emails through your SMTP server' contains instructions to configure emails to be sent through vandagraphst.com SMTP servers, with a 'Learn more' link. A status message states: 'You're currently using: secured connection on port 587, using TLS. To edit, please adjust your preferences below.' The form fields are: 'SMTP Server' (smtp.gmail.com), 'Port' (587), 'Username' (viamedinbox@gmail.com), and 'Password' (masked with dots). There are two radio button options: 'Secured connection using TLS (recommended)' (selected) and 'Secured connection using SSL'. At the bottom are three buttons: 'Cancel', '<< Back', and 'Save Changes'.

Click Save Changes.

Send a Test email from your gmail account, but select the send as email the one you just updated the settings for,

Send the mail to your @viamed.co.uk address.

1. You should receive the email into your account.
2. You should also see a copy of your sent email in the MAIN inbox sent mail folder.

Now do any other 'send as' addresses in your gmail settings accounts list. Use the same smtp settings for all email accounts.
