Re Geratherm sensor, this is in the cross ref. as no equivalent. Yes OOM109-LF2 looks the same, but we are informed that the Geratherm version has different specifications.

I have forwarded you this customers latest reply 👍 he appears to want to take a risk with the OOM109-LF2

Steve 3:07 PM

If he orders, then it is at his own risk. We are not aware of the technical specification differences or whether they are significant or not.
