Nufer Medical, serial number format for Ceratherm radiant warmers

Issue ID #95464

Date Created 25/May/2017

Issued To: Derek Lamb

Completed Status: Still Outstanding

Notes:

Added by Steve Nixon sent to Derek Lamb

Meaning of the digits in the serial number (from left to right):

Continuous serial number (1-4 digits)

Model code (one digit, 3 for Ceratherm 600-3)

Manufacturing month (two digits)

Year of manufacture (two digits)

e.g. for 6930612 (69 3 06 12).

Unit number 69, Ceratherm 600-3, manufactured in June 2012.

The above is from Daniel at Nufer and please also see attached a copy of a Nufer datasheet.

So, if not already done so, we can allocate warmers in sequence in incremental serial number order.
