Notes Customer has a 2nd hand VM-2500-S bought from eBay (prev belonged to Eden Medical). s/n 60920170. She is a locum vet. nurse. Fault is CO2 sensor error. She has replaced the single use line and the light is green, but as soon as a breath goes through the connector light goes red and nothing registers. Customer aware this may be costly and it will need to go off site. Would like to send it in to see if a repair would be in her budget. Asked for all parts she is using it with to be included with device
