Section 7 - Handling and Storage

Precautions for safe handling:

Consumption of food and beverage should be avoided in work areas.

Wash hands with soap and water before eating, drinking.

Ground containers when transferring liquid to prevent static accumulation and discharge.

Information about fire and explosion protection

Batteries may explode or cause burns, if disassembled, crushed or exposed to fire or high temperatures. Do not short or install with incorrect polarity.

Conditions for safe storage, including any incompatibilities:

Requirements to be met by storerooms and receptacles

Store in a cool, dry, well-ventilated place.

Information about storage in one common storage facility

Dongguan Aien Battery Technology Co.,Ltd

Batteries must be stored in a temperature range of $-20^{\circ}\text{C} \sim 45^{\circ}\text{C}$.

If the battery has to be stored for a long time (Over 3 months), the environmental condition should be:

Temperature: $23 \pm 5^{\circ}\text{C}$

Humidity: $65 \pm 20\%\text{RH}$

The voltage for a long time storage shall be $3.80\text{V} \sim 3.95\text{V}$ range.

Read and observe the following warnings and precautions to ensure correct and safe use of Li-ion batteries.

Do not immerse the battery in water or wet it.

Do not use or store the battery near sources of heat such as a fire or heater.

Do not use any chargers other than those recommended.

Do not reverse the positive (+) and negative (-) terminals.

Do not connect the battery directly to wall outlets or car cigarette-lighter sockets.

Do not put the battery into a fire or apply direct heat to it.

Do not short out the battery by connecting wires or other metal objects to the positive (+) and negative (-) terminals.

Do not pierce the battery casing with a nail or other sharp object, break it open with a hammer, or step on it.

Do not strike, throw or subject the battery to severe physical shock.

Do not directly solder the battery terminals.

Do not disassemble or modify the battery in any way.

Do not place the battery in a microwave oven or pressurized container.

Do not use the battery in combination with primary batteries (such as dry-cell batteries) or batteries of different capacity, type or brand.

Do not use the battery if it gives off an odor, generates heat, becomes discolored or deformed, or appears abnormal in any way. If the battery is in use or being recharged, remove it from the device or charger immediately and discontinue use.

Do not use or store the battery where is exposed to extremely hot, such as under window of a car in direct sunlight in a hot day. Otherwise, the battery may be overheated. This can also reduce battery performance and/or shorten service life.

If the battery leaks and electrolyte gets in your eyes, do not rub them. Instead, rinse them with clean running water and immediately seek medical attention. If left as is, electrolyte can cause eye injury.

Use the battery only under the following environmental conditions. Failure to do so can result in reduced performance or a shorten service life. Recharging the battery outside of these temperatures can cause the battery to overheat, explode or catch fire.

Operating environment:

When charging the battery: $0^{\circ}\text{C} \sim 45^{\circ}\text{C}$

When discharging the battery: $-20^{\circ}\text{C} \sim 60^{\circ}\text{C}$

When stored up to 30 days: $-10^{\circ}\text{C} \sim 45^{\circ}\text{C}$

When stored up to 90 days: $-10^{\circ}\text{C} \sim 35^{\circ}\text{C}$

Dongguan Aien Battery Technology Co.,Ltd
