Dear Sophie san,

Good day.

Please see the attached document.

Payment for V1000 has been completed.

Could you please issue an invoice (a Commercial Invoice, not a Proforma Invoice) before shipping V1000?

Best regards,

Good morning,

Thank you for your email. The V1000 Foetal Heart Simulator is not classed as a medical device, it is testing equipment used to verify the performance of foetal heart monitors - it is not intended for patient use.

I hope this helps. If you have any further questions, please do not hesitate to contact me.

Kind regards

Dear Takanori

We have verified the V1000 with Sonicaid, Huntleigh and Philips devices, we have not verified it with us on a Contec device, but I believe it will work okay, as the V1000 is only simulating the foetal heart beat, there are no compatibility issues to consider.

Best regards

Ryan

Dear Mr. Ryan,

I would like to confirm one thing before purchasing.

Do you know V1000 can test Fetal Dopplers from Contec Medical?
