Hi Ryan

Apologies for this, miscommunication with ordering.

So we are still after 3 of them, however I would like to order 1 for now if possible on Mark's account, I will then solder the PCB on and make sure it works then order 2 more.

Mark Roberts from Sarnia Skin divers has an account with VANDAGRAPH. Mark Also works on the dive chamber with me.

**Contact Details**Sarnia Skin Divers

07781 101105

Please can you let me know if this is possible, they can be sent to his address.

Thanks

Hi Nathan

Please can you confirm if the sensor separates from the PCB, I have attached a copy of the specification, you can see the sensor has 3 pins that I assume connects on to the PCB in your picture.

The cost for the sensor without the PCB would be as follows:

CityTech 7OXV = GBP 125 each EXW

Hi Ryan

Thanks for the prompt reply.

We would need 3 of them, it's for a dive chamber.

We are based in Guernsey, just to let you know.

Thanks  
Nathan

Hi Nathan

Thank you for your email.

This is not something we have available from stock, but we may be able to source them. Is it just one sensor you need?

Best regards  
Ryan

Hi. Can you let me know if you can get the attached O2 Cell? Or can source?

We would have to solder the wires.

Thanks  
Nathan
