Hi Ken

I can confirm that we supply the R-45V for use in the Philips EV300.

We only have a small margin on our distributor pricing, so the price for 150 or 1 sample would be the same:

0110045 Oxygen sensor R-45V = USD \$40

If you would like, we can send you a proforma invoice for 1x sensor with shipping costs and if you are happy to proceed you can make the payment by either bank transfer or card.

I will await your response.

Kind regards

Ryan

Hi Ryan

I have had discussions with my client. They are looking at the possibility of using your **Viamed R-45V Oxygen Sensor Part Number: 0110045** instead of the Maxtec. Can you please give me the best price for 150Pcs.

Secondly, they require a sample. How can we get the sample delivered to us? I understand that Philips ev 300 in Saudi Arabia used your R-45V sensor, so we believe it will work. I await your response.

Hi Ken

We only have a very small amount of MAX-16 in stock, but they are still available, the lead time would also be approximately 8 weeks.

The Viamed R-45V is a suitable replacement (manufactured by Envitec-Honeywell), again the lead time would be typically 8 weeks, but we could supply a part shipment of approximately 50 sensors from stock..

Best regards

Ryan

Ryan

That's a looong time... Would there be some amount available within 4 weeks, then the balance later?

Just for my knowledge, what of the model Max-16? Is it being discontinued?

Thanks & Regards,

Hi Ryan

How are you? It's been long since we have been in communication. I hope all is well at Viamed.

I am currently participating in a project with Philips Medical on ventilators, as part of their support contractors. We are looking for approximately **146Pcs** of **Max-16 (R114P70)** & I believe the **MAX 125M** is the right replacement.

Can you please give me a very well discounted offer & also advice on the delivery period?

I have sent you a message also on your whatsapp. My number's +254 722 342 355

Max-125 Oxygen Sensor

Replacement For

- Maxtec [R114P70 – Max-16]
- Covidien [4-072214-00, 980, 840, 740, 760, PB2000 Tester]
- Philips (Respironics) [Helix, Trilogy EVO]

Specifications

- Range of Measurement: 0 to 100%
- Output Range: 10.5 to 15 mV
- Zero Offset: ≤ 0.50 mV
- Response Time: ≤ 15 s

Thanks & Regards,

Ken Sara
