Message

Equipment does not appear to be turning on correctly. Not sure if it is the main unit or leads. Please investigate and quote for repair.

Return date**Signature**

The equipment should at return be controlled both from a security and functional perspective so that the equipment can be set directly into use without any further measures. A complete protocol over discovered faults, performed measures, changed components, measured values and performed functional controls and safety tests should be attached. These protocols do not release the supplier from the responsibility if a functional fault would appear that could jeopardize the safety of the staff or patients.

The goods are to be returned to the address below

Invoice address Invoice Payable
